PRICE GUARANTEE

Since 1981, we have led the industry by continuing to offer the lowest national prices while providing quality service. Many companies have come and gone trying to imitate our quality and service. If by some oversight we do not have the lowest prices advertised on the products you desire, then we would appreciate the opportunity to rectify this oversight.

TO ORDER, CALL TOLL-FREE: 1-800-233-8760

OVER 350,000 SATISFIED CUSTOMERS • ALL MAJOR CREDIT CARDS ACCEPTED • CREDIT CARDS ARE NOT CHARGED UNTIL WE SHIP

POLICY: Add 3% (minimum \$7.00) shipping and handling. Larger shipments may require additional charges. Personal and company checks require 3 weeks to clear. For faster delivery, use your credit card or send cashier's check or bank money order. Credit cards are not charged until we ship. Pennsylvania and Maryland residents add appropriate sales tax. All prices are U.S.A. prices and are subject to change, and all items are subject to availability. Defective software will be replaced with the same item only. Hardware will be replaced or repaired at our discretion within the terms and limits of the manufacturer's warranty. We cannot guarantee compatibility. All sales are final and returned shipments are subject to a restocking fee. We are not responsible for typographic or photographic errors.

YOU ASKED US TO BRING BACK THE SAVINGS— The Newsroom® is now sale priced for your 8-bit Atari®

The Newsroom includes everything you need to create great looking newsletters: Choose from over 600 pieces of clip art • Modify clip art or create your own with powerful drawing tools • Use the built-in word processor to write in any of five fonts • Change your page easily—text automatically wraps around pictures to simplify layout and editing • Add Clip Art Collection™ Volumes for truly professional results!

Over 350,000 families, schools and businesses are using The Newsroom to tell their story. Now it's your turn.

Mix text and graphics in two-column layouts with dramatic full-width banners!

**SAVE up to \$70 (over 50%!)
on The Newsroom and Clip
Art Collection™ Volumes.**

- **Clip Art Collection Volume 1:**
Over 600 pieces of all occasion art.
- **Clip Art Collection Volume 2:**
Over 800 pieces of business art.
- **Clip Art Collection Volume 3:**
Over 600 pieces of sports and recreation art.

Product(s)	Suggested Retail	Special Offer	You Save
The Newsroom	\$ 49.95	\$39.95	\$10.00
The Newsroom + any 1 Clip Art Vol.	79.90	\$49.90	30.00
The Newsroom + any 2 Clip Art Vols.	109.85	\$59.85	50.00
The Newsroom + all 3 Clip Art Vols.	139.80	\$69.80	70.00

Each Clip Art Collection Volume has a suggested retail value of \$29.95. The Newsroom and Clip Art Collections are available for these Atari 8-bit computers: 800XL™, 130XE™, 65XE™, Atari 1050™ or compatible disk drive required.

To order by phone, call toll-free:

1-800-445-4780, ext. 3020

Phone orders accepted 8:30 a.m.-4:00 p.m. Monday-Friday Central time (VISA/Mastercard only).

Ask for "The Newsroom Atari Offer." 30-day money-back guarantee!

This is an exclusive offer directly from Springboard. This offer ends February 28, 1989.

New Antic 8-Bit Catalog—Bigger Than Ever So now it's up to you . . .

Many longtime Atari users remember that dark day in 1984 when Atari announced the closing of APX, the Atari Programmers Exchange. APX had been a major source of great software that was considered too "specialized" to make it into normal commercial channels. All the APX programs were about to disappear, but **Antic** moved quickly. We thought that our readers could rescue the APX software, so we formed the Antic Arcade to help.

And you proved we were right! You bought Arcade products and kept the APX titles alive. The Antic Arcade was successful from the first day. It grew rapidly and became The Catalog. The Catalog grew and became Antic Software, which has grown into a major independent software developer supporting several computer brands.

In the meantime, we have not forgotten our roots in the Atari 8-bit market. We see the 8-bit retail channels drying up. Major manufacturers will no longer support the 8-bit. Small manufacturers cannot get distribution. Retailers will not give Atari products shelf space. Atari owners cannot find the software they need. What's the answer?

We think it's time for the Antic Arcade again. We think you readers can rescue the Atari retail market! So we're taking the first step. We re-opened the Antic Arcade and are making it bigger than ever.

The Arcade is seeking out warehoused Atari products from the major manufacturers. We are locating the existing stocks of discontinued products. We are negotiating the re-manufacture of abandoned products. We are finding and preserving "lost" programs for reissue. Tragically, some fine programs appear to be gone forever. The source code and even the production masters have been destroyed. We are trying to prevent further destruction of valuable Atari 8-bit software.

We're actively seeking out smaller developers. Professional programs are being written today which are superior to anything from the past. They are often being sold mail-order from the programmer's kitchen table. We want to provide these programs the distribution they deserve.

The Antic Arcade will deliver the best products for your Atari. Of course, the full line of programs we already developed for The Catalog is back again. Four years of development here produced more than 50 great software titles covering the spectrum from programming tools to exciting entertainment and educational enhancement.

Here at **Antic** we are doing our part to keep the 8-bit Atari alive. But the Arcade will only succeed if you do your part too. Let us know that you want the Arcade to continue by placing your first order today. Tell your friends. Tell your users group. The future of the Antic Arcade—in fact, the whole future of 8-bit Atari software in North America—is now up to **Antic** readers like you!

POSITRONIC PRICES

Correct prices for three Positronic Software titles listed on the November 1988 ST New Products should have been: GradePlus, \$39.95; Test Maker, \$39.95; SeaChest Library, \$19.95—ANTIC ED

CREATION CORRECTION

Our group is elated that one of our students won the grand prize in the *Adventure Creation Contest* (Antic, October 1988). But I was given credit instead of the actual programmer, Aaron Kramlich, a teenager from Fogelsville, PA. I am a retired school psychologist, having served the Allentown schools for 30 years. (Their elementary schools use Ataris.)

Robert "Dr. Bob" Loux, Ph.D.
Allentown, PA

DISK DOCS

How do I create disk text files like those on your fine Catalog products?

Alan Johnson
Johnstown, PA

Prepare your document with any word processor (such as PaperClip) that can print a file to disk. Set your left margin to 0 and your right margin to 37. Then print the file to disk.—ANTIC ED

XEP80 HANDLER

In Matthew Ratcliff's *XEP80 Slide Show* (Antic, October 1988), he said, "You can forget about 80-column compatibility with ICD/OSS software such as BASIC XL and BASIC XE."

I'm here to tell you that before ICD acquired OSS, the OSS bulletin board carried a BASIC XE handler for the XEP80. I use it myself, and it's 100% compatible with BASIC XL/XE.

Terry Ortman
Decatur, IL

BRAIN CORRECTION

After writing *Atari Brain Transplants* (Antic, November 1988), I discovered that the Newell upgrade is not really compatible with XLEnt Software's Typesetter. The program writes only one half page at a time, and when you switch to the bottom half, the top half continues to be displayed even though you are writing to the bottom half. Presumably this is because the ANTIC chip is trapped in main RAM while in the true 130XE it can be switched into extended banks.

Lee Brilliant, M.D.
Granada Hills, CA

SLCC ADDRESS

Your June 1988 issue mentioned that the San Leandro Computer Club Journal had an article about how to modify the Atari XF551 disk drive for use with 3 1/2 inch disks. Could you please give me their mailing address?

Capt. John Glessner
KAFB, NM

SLCC is at P.O. Box 1506, San Leandro, CA 94577.—ANTIC ED

XEP80 TIP

I bought a switch box with two "ins" and one "out." My XEP80 monitor cable goes in one side. My Atari's monitor cable is split so that the video side goes into the switch box and the audio goes into the monitor. Instead of booting 40-column software with [SHIFT] held down and (usually) without printer use, I now boot with the switch box on and use the printer—just like before I added the XEP80 to my system. Note that with this arrangement, the XEP80 never needs to be turned off. You can turn off the computer without turning off the XEP80 and its display will stay on the screen.

Kevin Evart
Spokane, WA

IC CLARIFICATION

Thank you for the excellent review of Easy Scan in your October 1988 issue. However, only Innovative Concepts was mentioned. Actually it was a joint venture also involving Jim Steinbrecher of Sector One Computers. He's the original author of AMODEM.

Due to popular demand (and your review), we will be adding Graphics 9 capability to the Easy Scan software as soon as possible. IC now is on Data Library 15 in the Atari 8-bit section of CompuServe. Our new CompuServe ID is 76004,1764.

Mark Elliott, President
Innovative Concepts

CROSS-TOWN CRAZY 8

I was pleased to see the generally favorable review of my game program, "Cross-Town Crazy Eight" in the October 1988 Antic. However, I must correct some mistakes.

While the 8-bit version of the game does support a Hayes-compatible modem with an 850 interface, P:R: Connection or equivalent, it also supports the Atari XM301 and 1030 modems automatically, without user interaction, as stated on the dust jacket and in the documentation.

Regarding the 8-bit version, the review says that "placing the cursor on a card and pressing the button to select it renders the card almost invisible!" Not quite true. The card "fades" somewhat to indicate the selection. If you can't tell or don't remember what the card is, just click on it again to deselect it.

The review also says that "if you don't release the joystick button fast enough, it reads multiple button presses." Also not true. Only the first button press is read until you release the button.

Later, the review says that in the ST version, "you can quit at any time, get information about the game in progress and load a saved game. (Most of these functions are not available on the 8-bit version.)" In fact, the only function listed

above that is *not* available on the 8-bit version is game information.

Finally, the reviewer was disgruntled that the game let you play an eight on an eight. According to Hoyle (specifically, "Hoyle Up-To-Date," published by Grosset & Dunlap, New York), on page 38: "An eight may be played on an any preceding card, *regardless* of its suit and rank." Grated, other liberties were taken with the standard rules of Crazy Eights, but after all, this is Cross-Town Crazy Eight, a computer game, not Crazy Eights, a card game.

Patrick Dell'Era
Fairfax, CA

WHERE'S A MEGA

I couldn't find a dealer who sold the Atari Mega 2, so I phoned Atari. The representative, while very courteous, shocked me by saying that there aren't any Mega dealers in the Northern New Jersey area and that the nearest one was over 100 miles away.

I live about 15 miles from New York City—and was even more shocked to learn that there aren't any Mega dealers there, either, despite a population of about 8 million and at least 20 computer stores.

How can I buy one of Atari's new computers if I can't even find a store that sells one? Not only that, but I'm also told that Atari has stopped selling their 1040STs through mail order companies, so how can I shop around for the best price?

Kenneth Castka
Wyckoff, NJ

Antic is not in business to defend the Atari Corp. against points as well taken as yours. We too would like to see the Atari management find more consistent ways to deliver on Chairman Jack Tramiel's oft-declared goal of making powerful, lower-priced computers easily available to the general public. At this writing, Atari is still in process of a wide-spread reorganization of its distribution channels and the ultimate efficiency of the new marketing system remains unproven.—ANTIC ED

RAMDISK HELP

I'm responding to John Kolak's letter in the August 1988 *Antic* where he discusses using AtariWriter with a RAMdisk, MyDOS and Omniview.

MyDOS and Omniview 256 support RAMdisks and can do so independently of each other as long as memory and drive numbers are organized to avoid conflicts. Omniview uses memory from the bottom up, and MyDOS can be told which banks to use—leaving Omniview alone. When the Omniview RAMdisk is used, for instance, as D2:, then real D2: becomes D3:, and so on. If the MyDOS RAMdisk is used as D3:, then it will actually replace the real D2: (moved to D3:). It's best not to have a real drive with the same number as the MyDOS RAMdisk.

Sticking with standard single-density disks, you can set up two RAMdisks easily. A standard Omniview RAMdisk will occupy about 96K, leaving MyDOS with everything above that. Just configure MyDOS with the device number and a list of the high banks to use. Don't forget to configure the Omniview RAMdisk as the proper drive number. Then write the DOS files to disk.

Keep in mind that MyDOS doesn't allow the J option to duplicate files, so you must use the C option to copy them instead.

Mr. Kolak has his support files in the RAMdisk and wants to move his dictionary there as well. The Atari Proofreader program requires the dictionary to be in real D1: Since it must be duplicated—most dictionaries don't use standard DOS files—only the Omniview RAMdisk will work (if used as D1:). But the Proofreader uses the physical drive, bypassing DOS and Omniview. To use the dictionary from the RAMdisk, Mr. Kolak will have to make patches to Proofreader so it will use standard DOS calls to the CIOV instead of the SIO, etc. Surely this is more trouble than it's worth. And don't forget the conflict of using the dictionary as D1: while also using D1: to store the support programs.

Rick Detlefsen
Austin, TX

NX AGREEMENT

I have noticed the change in the slant of your reviews. They seem more complete now, with more willingness to give a negative report when warranted (i.e. the Star NX-1000 printer). I started buying your magazine in 1985 for your opinions. If this trend continues, I will definitely renew my lapsed subscription. Keep up the good work.

Daniel Suthers
Concord, CA

HELP

P/M GRAPHICS STUDIO

In *P/M Graphics Studio* (September 1988), the GETTING STARTED section of the article is incomplete and the opening paragraphs should read as follows:

"Type in Listing 1, PMED.BAS, checking it with TYPO II and SAVE a copy before you RUN it. Next, type in Listing 2, PMED.ANM, checking it with TYPO II and SAVE a copy before you RUN it.

"If you have trouble typing the special characters in lines 30001-30002 in *either listing*, don't type them in. Instead, type Listing 3, check it with TYPO II and SAVE a copy. When you RUN Listing 3, it creates these hard-to-type lines and stores them in a file called LINES.LST. LINES.LST may be merged with *either* Listing 1 or Listing 2."

Antic welcomes your feedback, but we regret that the large volume of mail makes it impossible for the Editors to reply to everyone. Although we do respond to as much reader correspondence as time permits, our highest priority must be to publish I/O answers to questions that are meaningful to a substantial number of readers.

**Send letters to: Antic I/O Board,
544 Second Street, San Francisco,
CA 94107.**

The **ATARI** Resource

The **Diamond Operating System** is here for your Atari XL/XE/GS computer. With the **Diamond OS** your computer will have a complete windowing environment just like the Atari ST(tm). **Diamond** includes icons, windows, drop-down menus, dialog boxes, a mouse pointer, and desk accessories. In fact **Diamond** is so powerful it even breaks the 64K memory barrier and allows for up to 16 Megabytes to be accessed. **Diamond** is the future of the Atari XL/XE/GS computers so now the choice is clear. Crystal clear. **Diamond** is truly a Gem!

Now Available

Diamond OS-

Our powerful Operating System and DeskTop software in one package. This software is required to use other Diamond based programs.

\$29.95

Diamond Paint-

A fantastic painting program that utilizes the Diamond environment. Includes draw, block move, line, k-line, box, circle, and airbrush features and many more. Also accepts Degas (tm) pictures from the Atari ST(tm) and MacPaint(tm) pictures.

\$29.95

Diamond Write-

An amazing word processing program that includes cut and paste, an 80 column display, and a complete spell checker.

\$29.95

Diamond Publish-

A complete Desktop Publishing system! Allows text to flow from column to column, text wrap around graphics, and the creation of multiple page documents.

\$29.95

Diamond Programmer's Kit-

Includes complete documentation for the Diamond environment and includes a resource editor to easily create icons, drop-down menus, and dialogs, and programming samples in both Basic and Assembly language.

\$29.95

To order send either a check or money order or call for COD orders. Please include \$2.50 for shipping.

Happyface Reversi

Put a smile on your squares *By Edward Brown*

Happyface Reversi puts a smile on your squares as you battle to convert the playing board to your color. For one or two players. This BASIC program works on 8-bit Atari computers with at least 48K memory, disk or cassette.

Happyface Reversi is a challenging computerized version of the old board game Reversi, which was recently re-popularized under the name "Othello." You can play against your hard-to-beat Atari, watch your Atari play against itself, or take on a human opponent, setting as many four levels of handicaps if you wish.

The object of Reversi is to cover the

majority of squares on an 8×8 board with pieces in your own color, out-flanking rows of your opponent's pieces and reversing them into your color. The player who has the most squares at the end of the game wins. (A tie of 32 squares apiece is also possible.)

Just for fun, and for a slightly unusual graphic look, I put a different

version of the overly familiar happyface logo into each of the two opposing colored teams of squares. When you reverse a square's color, you also change its happyface smile.

GETTING STARTED

To play Happyface Reversi, type in Listing 1, REVERSI.BAS, check it with TYPO II and SAVE a copy before you RUN it.

Here's how it works. The main program loop begins at line 1535. Computer moves are determined in the large subroutine starting at line 660 by maintaining a VALUE matrix of the desirability of each position on the board. The Happyface Reversi program searches for the most desirable legal move available using this matrix and the current board positions.

PLAYING REVERSI

At the title screen, press [START] to play. You'll first be prompted to indicate who controls each player's moves, the computer or a human opponent. The program then asks if you want to set up a handicap for one of the players by giving an initial one-corner to four-corner advantage. To continue, make your selection.

Happyface Reversi now draws the playing board onscreen and sets up the initial positions, including handicap corners. Purple always moves first and is controlled by a joystick plugged into port 1. Green is con-

trolled by a joystick in port 2. The colored arrows on the sides of the screen indicate which player has the next move.

Move the white cursor to the desired square on the board and press the joystick button. If you attempt an illegal move, the computer will buzz. If you have no legal move, press the [SPACEBAR] to pass on your turn.

To legally outflank your opponent, place your pieces on the board so that your color is on both ends of a row of your opponent's pieces, or on opposite sides of an opponent's single piece. All of the outflanked pieces will be changed to your color and your happyface. Any number of pieces can be outflanked with one move, in any direction including diagonally, and even in more than one row. To really get the hang of Reversi, set the computer to play against itself and observe the moves.

Players alternate moving single

pieces until all 64 squares are occupied, or till neither player has a legal move, or till all pieces on the board are of the same color. The player with the most squares wins. The final score is displayed at the bottom of the

The player with the most squares wins.

screen and the borders of the board flash the victor's color. To start a new game, hold down either joystick button.

You can switch player control between human and computer in the middle of a game by pressing [OPTION] or [SELECT] or [START] after

a prompt, or while the program is waiting for joystick movement.

REVERSI STRATEGY

Corner positions are very valuable, because they cannot be outflanked and can be used as ends for rows extending in three directions. Squares on the edges of the board are also valuable, since they can only be outflanked along the same edge. Getting a complete edge of your color can provide an armored rearguard for outflanking your opponent in the middle of the board.

The move that outflanks the largest number of opponent's pieces is not always necessarily the best move. Smaller strategic moves can often give a big payoff later in the game. ▲

Ed Brown is a computer science major at Indiana-Purdue University. His first Antic appearance was in December 1984.

NEW HACK BACK Special OFFER

The Alpha Systems HACK PACK contains all our finest products for making Back-up copies, Analyzing, Understanding and Protecting your Atari programs. It comes complete with Atari Protection Techniques (Book and Disk I), Advanced Protection Techniques (Book and Disk II), The Chipmunk, The Scanalyzer, The Impersonator and Disk Pack 1000. Worth over \$150. Get them all for the special price of **Just \$99.95**

Atari Software Protection Techniques Vol I & II

These Book and Disk packages detail the most advanced copy protection methods in use today. They guide you through the methods used to create the protection as well as the copying techniques to get around them. They include information on Phreaking • Hacking • On-line security • Black boxes • Self-destructing programs • Pirate bulletin board systems • Logic bombs • New piracy laws • Hardware data keys • Weak sectoring (Phantom, Fuzzy and unstable sectors) • Overfilled tracks • CRC errors • Bank Select cartridges and MUCH, MUCH MORE. The disks include automatic program protectors, Protection Scanners, directory hiding and more

BOOK I and DISK I \$24.95
BOOK II (Advanced protection) and DISK II \$24.95
Special Offer, Order both sets for Only \$39.95

CHIPMUNK

Automatic Disk Back-Up System. Make perfectly running unprotected back-up copies of hundreds of the most popular Atari programs. Chipmunk's sophisticated programming Automatically finds and **REMOVES copy protection** from most Atari programs. Back-up even heavily protected programs with ease. Finally, a back-up system that needs no special hardware or skills

(If you need a full list of what Chipmunk copies, call or write for our free catalog) **\$34.95**

Scanalyzer Automatically scan & analyze commercial programs. Unlock programming secrets and learn from the masters **\$29.95**

Impersonator Cartridge to Disk back up system. Create running back-up copies of any cartridge (up to 16K) **\$29.95**

NEW CHEAT

Get more from your games with CHEAT. Tired of spending days trying to beat a game? Tired of getting stuck just when you need another life? Cheat is an innovative new product that gives you the chance you need to beat your favorite games. Cheat works with hundreds of Atari games to give you unlimited lives or power. End the frustration and get hours more enjoyment from your games. (Call or write Alpha Systems for our free catalog with a full list of the programs that work with Cheat) **ONLY \$24.95**

BASIC TURBOCHARGER

NOW for the first time a BASIC programmer can get the power, flexibility and incredible speed of machine language. BASIC TURBOCHARGER is a **book and disk package** that contains over 150 ready to use machine language routines. Complete instructions show how to add them to your own BASIC programs to get these features and more: • Smooth Scrolling • Player/Missile control • Load & Save Picture files • Sorting and Searching • Special Effects Graphics • Incredible Speed • Much, Much More • Over 150 programs. You've heard of the power of Assembler, now harness it for your own needs **\$24.95**

ATARI 8-BIT POWER

ALPHA SYSTEMS is constantly innovating to provide more power
for your 8-bit Atari

NEW PARROT II

An All New Parrot sound digitizer for your Atari. Parrot II is a sophisticated new hardware device that plugs into your joystick port. Parrot II has two inputs. One for a microphone and one for a powered source such as a tape player, radio or Compact Disk.

The Powerful Parrot II software lets you record sounds into your computer and play them back on any Atari. Parrot II turns your computer's keyboard into a musical instrument with nine different sounds covering three octaves each. The sounds can be anything, a dog's bark, a piano, a complete drum set, a symphony or your own voice.

Parrot II lets you modify the sounds on a graphic display to create brand new sounds and special effects. Best of all, the sounds and voices can be put into your own programs that can be used on any standard Atari. Explore the world of digital sound and music. **ONLY \$59.95**

Pre-Recorded Sound Disk More pre-recorded sounds for Parrot **\$4.95**
PARROT II Demo Disk (Does not require Parrot to run) **\$5.00**

NEW POP-N-ROCKER

a fast paced, multi-player trivia game that mixes questions with real songs (digitized with Parrot). Be the first to identify the songs and answer the music trivia questions. **Pop-N-Rocker** comes with three data disks and lets you add new questions so it will never get old. You can use a Parrot Sound digitizer to add new songs too! Use any kind of music from Rock to Classical to Nursery Rhymes. A new concept in entertainment and a perfect add-on for Parrot. **\$24.95**

COMPUTEREYES & MAGNIPRINT II +

Turn your computer into a digital portrait studio. This complete package lets you **capture, save & print** digital images from your **Video Camera, VCR or TV**. COMPUTEREYES hardware plugs directly into your joystick ports for easy use. Print your picture on a 6 foot poster. **\$119.95**

ComputerEyes camera system

Comes complete with everything above, plus a black and white video camera and connecting cable. **\$329.95**

Graphics 9 Software Add a new dimension to your COMPUTEREYES pictures — captures images in 16 shades of grey **\$12.00**

Magniprint II +

Easily the most powerful print program available today. Print graphics from almost any format in hundreds of shapes, sizes, and shades. Supports **color printing** and lets you create **giant posters**. Magniprint II+ lets you stretch and squeeze, invert, add text, adjust shading and much more. Works with EPSON, NEC, Cihoh, Panasonic, Gemini, Star, XMM801, and compatible printers. (850 interface or equivalent required) **\$24.95**

Graphics Transformer

Now you can combine the most powerful features of all your graphics programs. Create print shop icons from a Koala pad picture, from a photo digitized with ComputerEyes, or any picture file. Graphics Transformer lets you **Shrink, Enlarge and Merge** pictures for unequalled flexibility. **\$22.95**

YOUR ATARI COMES ALIVE

SAVE MONEY. Finally an alternative to buying expensive computer add-ons. Your Atari Comes Alive shows you how to **build them yourself**. This **How-To book and disk package** gives you complete step by step instructions and programs needed to build and control these exciting devices and MORE: • Light Pen • Light & Motor Controllers • Alarm Systems • Voice Recognition • Environmental Sensors • Data Decoders • More than 150 pages. **Your Atari Comes Alive \$24.95**

TapeTime

Will the whole movie fit?

By Paul Shannon

TapeTime tells you how much recording time you have left on your VHS or Beta video cassettes, no matter how many different speeds you used on various sections of the tape. You'll never again lose those climactic movie scenes. This BASIC program works on all 8-bit Atari computers of any memory size, with disk or cassette.

Wouldn't you know it? You wait months to see "Heebie Jeebie Hotel," possibly the scariest movie ever made, and they decide to show it at 5 a.m. on cable. So you find a tape that appears to have enough room on it and you set your video cassette recorder. But the next day, guess what? You have all but the final 10 minutes of the film—the tape ran out. Now you'll never know who skinned those poor people alive with a potato peeler.

If you use your VCR a lot, undoubtedly you have a lot of video tapes. Many of these tapes still have room at the end—but how much? If you recorded two 30-minute programs on a VHS tape in high-speed mode, it's not too difficult to figure that since a VHS tape has a total time of two hours in this mode, you have an hour left.

But what if you recorded one program in extended play mode, the slowest speed, and another program at standard speed? Now you have an 84-minute movie you want to record. Which speed could you use and not lose part of the movie?

GETTING STARTED

TapeTime enables your 8-bit Atari to compute the amount of time left on a video tape, in all commonly used speeds on VHS or Beta formats. This is the first program I wrote and it has proven to be a great help in organizing my video collection.

Type in Listing 1, TAPETIME.BAS, check it with TYPO II and save a copy before you RUN it.

TapeTime computes for both VHS and Beta formats. After you choose one or the other, TapeTime will ask for the length of the tape you're using—T-120 or T-160 for VHS, L-750 or L-830 for Beta. These are the most common tape lengths.

Next, you're prompted to enter the times for each program in each speed. VHS video tape recorders usually have three recording speeds. SP (Standard Play) is the fastest and gives best picture quality. Slower LP (Long Play) has slightly less picture quality. EP (Extended Play) gives the least picture quality, but has the most recording time. NOTE: Some VHS recorders don't have LP and on some machines the EP speed is called SLP (Super Long Play). Most Beta recorders have two speeds: BII is the fastest and has best quality, while BIII yields the largest

amount of tape time.

Suppose you have a T-120 VHS tape that has 10-minute and seven-minute music videos in SP, three 30-minute situation comedies in LP and a 104-minute movie in EP. TapeTime will first ask you to enter the minutes SP. So you'd type 10 and press [RETURN], then type 7 and press [RETURN]. When you're done entering programs for one play mode, type 0 and press [RETURN] to go to the next speed.

Now enter 30 and [RETURN] for each LP sitcom. Type 0 to move to EP, enter 104, press [RETURN] and type 0 again. Then you'll be told that you have 23.33 minutes left at SP, 46.67 minutes at LP and 70 minutes at EP. Now you can either continue timing more tapes or print these results.

TapeTime converts the time in each play mode to meters of tape. If you enter too many minutes for a tape, the result will be a negative number—

you'll *know* you have no room left. If you need to carry over a program to another tape, this feature will tell you how much time the program will take up on the next tape. Also, because of differences in machines, you still may find a little tape left over.

So rest assured, you won't miss the exciting climax to that next late-night movie. Let's see, tomorrow at 3 a.m. they're showing "The Boogens II"...

ANTIC CHALLENGE

Can you write a short, simple patch making it possible for TapeTime to print titles, speeds and times on the different-sized labels for VHS and Beta Cassettes? Antic would be interested in publishing the best add-on labeler we receive.—ANTIC ED ▲

MAGNIPRINT II+

By David Merrihue

No sooner had I brought my very first shiny new dot matrix printer home than did I run to my fellow computer lovers, bragging about the Works of Art that would soon sprout from its fertile form feed. My den would become a greenhouse of graphics, a nursery nurturing cross-pollinations of computer creativity.

The new Star NX1000's tractor would plow a fertile field indeed. My dear departed Atari 1027 would smile down from that Great Device Timeout In The Sky, knowing that a new and more agile generation was creating a better world. Favorite graphics, even those not designed for computer printing, would look better than ever in print after being finetuned with some suitable printing utility.

How about signs and greeting cards using pictures from my favorite movie or home video? Double-page B/Graph prints in four colors? Giant posters made from my children's paint program art! I would use game display screens or movie frames in my BASIC programs! Adult invitation cards sporting *Strip Poker* graphics! These projects and more would be possible, with a couple of good programs to facilitate them. . .

Well, yes, it's all possible, but not exactly easy. The world of microcomputer graphics and printing is a confusing morass of incompatible graphics formats, modes, programs,

printer drivers, etc. There are numerous programs that convert, manipulate, and print graphic images, and some are quite good. But what we really need is a program that puts the most important utilities together into one versatile, easy-to-use package. After all, the less time I spend with my head buried in a stack of program documentation or staring at the word "LOADING. . .", the more comfortable and creative I'll be with my computer.

Alpha's **Magniprint II+, version 4.1** (\$24.95), while not quite my Dream Program, is a very useful tool that will let you use graphics from just about any format, including the widely used Micro-Painter and Micro Illustrator, plus B/Graph, Computereyes, Print Shop, Strip Poker and BASIC screens! What's more, Magniprint II+ really makes your dot-

matrix printer sing. It prints the 4 colors of Graphics 7.5 (ANTIC mode E) in adjustable gray scale, and it prints the 16 shades of GTIA Graphics 9. (*Earlier Magniprint versions have been reviewed in previous issues.* — ANTIC ED)

Magniprint II+ directly accesses picture files stored in compressed Micro Illustrator format, such as Koala Pad, Atari Touch Tablet, or Suncom Animation Station. All others will have to be converted. Once you have your source picture file on a data disk, the conversion process is easy.

You'll need 66 disk sectors for each picture. Magniprint II+ reads and converts the files on the spot, temporarily cutting down on disk swaps for 1-drive users—but leaving both the original and the converted files on the disk. Later, you'll want to delete the original to save on disk space.

Reversed image for T-shirt design

Magniprint II+ can save your graphics to disk in Micro-Painter 62-sector format, or it can save Graphics 7.5 images (also called Graphics 15 or ANTIC mode E) in compressed Micro Illustrator format. Most files can be converted to Graphics 7.5 inside Magniprint II+, printed as Graphics 7.5, 8, or 9, and saved as 7.5. They can then be used by programs that read those modes.

Some software such as Print Shop uses its own unique storage format. I've had good results using Picture Plus and Graphic Shop (both from the Antic ARCADE catalog) for post-Magniprint conversions.

After booting Magniprint II+ and loading a graphic, you can make a "quick print" to get an idea of what you have. Now let's edit! You have a choice of the original colors, or two alternate color schemes. There is a joystick-controlled "touch up" mode that will draw or erase dot by dot. This is the weakest part of the program—if you have other software for that function, try it first. The entire image can be easily scrolled and cropped, so your borders are where you want them.

Text can be added anywhere in the graphic, in four sizes, positioning it by joystick. Text and scrolled position can be saved to disk. To access these choices while in the view/edit mode, just press the [SPACEBAR]. Five character sets are on the disk. Since the standard 9-sector character set file for-

mat is used, many more character sets useable with Magniprint II+ can be had from users groups or online services practically free (as well as many pictures in Print Shop and other formats).

From the print menu, the four Graphics 7.5 gray-scale registers can be adjusted. This is as close as you'll come to WYSIWYG for 8-bit graphics, and I find it quite useful. At this point, press [START] to print or [ESC] to go back to the view/edit mode. Your picture will be intact, but all your cropping and shading work will be lost, and there's no practical way to record the changes on paper.

Select one of as many as 8 sizes, depending on graphics mode, or 3 poster sizes. Print in regular or inverse (like a photograph negative), upright or sideways, blocked left or centered, in regular or "enhanced" (darker) mode if your printer supports it. Print in four colors, changing to different colored ribbons.

A "mirror image" feature reverses the picture, so you can make custom T-shirts by printing with special transfer ribbons. Printer line spacing can be adjusted if needed, and expanded printing can be toggled. If your printer defaults to non-expanded print, you can get a new perspective from your 3-D or wire-frame pictures by toggling to the "off" setting.

Okimate color printers won't work with Magniprint II+, and your interface must be compatible with the

Atari 850. There are drivers for Epson, Gemini/Star, Panasonic, C. Itoh, and the Atari XMM801—or anything compatible with the above. The driver sets up in less than a minute and away you go.

The disk also contains BASIC subroutines that let you use Magniprint II+ format screens in your own programs and convert screens drawn in BASIC to Magniprint II+ format. Graphics modes 3 through 11, and text modes 0, 1, and 2 can be used. Included is Print All, a screen lister program that prints everything exactly as it appears on your screen. This is a handy way to print your BASIC program listings which use Atari graphics characters or inverse characters.

The 130XE RAMdisk can be used to store pictures while Magniprint II+ is running. Of course, when you exit the program, your RAMdisk data is lost. Single and enhanced density are supported, but not double density. DOS functions cannot be performed from the program, but [RESET] is not trapped, so I enter SuperDOS or Atari DOS that way. A drawback here is that Magniprint II+ will not load from DOS. The disk is copy protected.

The user interface is as friendly and easy as it needs to be. It's not cluttered with unnecessary choices or menus. The 50-page manual has the information you need. As is often the case, I found that using the program several times and referring to the manual when I got stuck gave me the best sense of what's going on. A reference card and tutorial section are included. All in all, Magniprint II+, v. 4.1 is a "must have" in my book. My printer is hooked, and now I have to get a second job just to keep it in ribbon—and my kids in posters of Bugs Bunny, my wife in moire patterns, the church in Halloween party signs, my den in wallpaper. . . ▲

\$24.95, 48K disk. Alpha Systems, 1012 Skyland Drive, Macedonia, Ohio 44056. (216) 467-5665.

Talking Math Wizard

Software that speaks—no extra equipment needed! *By Matthew Ratcliff*

Math Wizard, my arcade-style arithmetic practice program for school-children, was published in the April, 1984 issue of *Antic*. This month's Super Disk Bonus is the Covox-enhanced sequel—Talking Math Wizard.

When you zap a correct answer, Talking Math Wizard speaks the complete equation. For example, if a 27 is at the top of the screen and you zap "11+16," the program would say: "Eleven plus sixteen equals twenty-seven."

Helping me program this magic was the \$39.95 Covox Voice Master Junior. However, you do not need a Covox or any other special equipment to play Talking Math Wizard—only the MATHWIZ.BAS, MATH.SYS and WIZTALK.SPK files from this month's Antic Disk. But if you do own a Covox Voice Master or Voice Master Junior, you can get rid of my voice from the file and put in your own voice—or any other

sound you choose.

When you RUN Talking Math Wizard from the Side B main menu of the Antic Disk, you'll see a game options menu. By fine-tuning these options, you can change the type and difficulty of the problems. Plug a joystick into port 1. Move the stick up and down to put the flashing cursor next to the item you want to change. Push the stick left or right to change the value of that option. Options include:

1. Minimum starting number (MIN): The smallest value used in the math problems.
2. Maximum starting number (MAX): The largest value used in the problems. This value must exceed MIN by at least five.
3. Percent Correct to Advance: Each round has six problems. To go to the next round, in which both MIN and MAX increase, your score must match or beat this value.
4. Difficulty Increment: The num-

ber by which MAX will increase after each round.

5. Rounds per game.

6. Problem type: Select addition, subtraction or multiplication.

The high score, most recent score and type of math problem for the high-score game are displayed near the top of the menu screen.

Press the joystick button to begin the game. The number of the current round, the problem number and your percentage of correct answers appear at the far right. The current problem type appears at the top of the screen. The answer box is below.

As the round begins, six problems scroll toward the bottom of the screen, where you are stationed with a number blaster (flashing cursor). An answer to one of the problems is selected at random, spoken and displayed at the top of the screen. Move the cursor under the problem whose answer corresponds to the one displayed above. Press the joystick button to select the matching problem. If more than one problem has the indicated solution, choose the one nearest the cursor to save time and earn more bonus points at the end of the round.

If your answer is correct, the problem is blasted back to the top of the screen. The correct answer is displayed beneath it, and then the

entire problem is spoken. Then the next answer is displayed and spoken, and the scrolling continues. If you blast an incorrect answer, it is ignored except for a lowering of your success percentage.

If a problem reaches the bottom of the screen before you can answer it, it will scroll back to the top of the screen. There, the correct answer will be displayed and the entire problem will be spoken.

If your percentage of correct answers is below the minimum, you must repeat the round. If your percentage is high enough, you will receive a bonus for speed and accuracy.

When all rounds are complete, the main menu comes up again and the high score is displayed. At this point you may press [ESCAPE] to exit to BASIC, or select new options and

play another game.

For Covox owners who want to insert new speech data, here's how to do it. First load the Voice Master software, version VM800 for the Atari 800. The XL/XE versions will not work properly with Talking Math Wizard II.

Note the USR calls in lines 50, 110, 190 and 210. With VM800 loaded, simply enter what you see in the REM portion of each line. The VM800 "wedge" software automatically translates those commands into the proper USR calls for you. Note that you may get an error with the SSAVE command. My version of VM800 has trouble parsing it, but the syntax is easily corrected.

RUN WIZTALK.BAS from this month's Antic Disk. Put a joystick in port 1 and the Voice Master microphone into port 2. WIZTALK will

prompt you for each word it needs to learn. Speak the word distinctly and quickly. After the program learns the word, it is played back for you immediately. If the word sounds all right to you, press the trigger to move on to the next word. Otherwise, pull back on the joystick to say that word again.

After each word is learned, total size of the current speech data is displayed. Keep a close eye on this: It must *not* exceed 12,000 bytes or it will be too large to fit in Talking Math Wizard. You may need to run WIZTALK a few times before you get a feel for how fast to talk.

Once you're done, copy MATHWIZ.BAS (the main program), MATH.SYS (which contains data for three assembly language routines) and WIZTALK.SPK to another disk and RUN "D:MATHWIZ.BAS". ▲

our projects and yours. Call or write.**

Job Jar Database

By Jeffrey Summers, M.D.

Job Jar Atari is a simple, useful database that keeps track of your family household chores, prioritizing the task lists by deadlines or by comparative importance. This BASIC program works on all 8-bit Atari computers of any memory size, with disk drive.

Kate Murphy

Fix the roof, or shop for Grandma's birthday?

So much to do and so little time to do it. Often it's difficult to get organized, so at my house we used a "job jar" containing little slips of paper on which are written jobs that need to be done. When you have some free time, you go to the jar and pick out a job at random. If you complete the job, you get to tear up the piece of paper and throw it out.

This works fine if all the jobs are of equal importance and none have special deadlines. But what if you have a job that must be completed by a certain date? What about the shed roof that's about to cave in if you don't repair it, yet you pull "write letter to Aunt Suzie" out of the jar? Aunt Suzie will be pleased to get the letter, but it might contain news about the shed roof collapsing and the cost of replacing the tools inside.

What if you only have an hour and want a short job? Of course you can fish around in the job jar to choose the higher priority job, the short job, or the job with the closest deadline. But that 8-bit computer sitting on your desk could make things a lot easier when you use it with Job Jar Atari. This program prioritizes your jobs and gives you lists of tasks in order of various criteria such as deadlines, comparative importance, or time allotted.

GETTING STARTED

Type in Listing 1, JOBJAR.BAS, check it with TYPO II and SAVE a copy before you RUN it. If you own this month's Antic Disk, transfer Job Jar Atari to a fresh disk that you will use for your job jars.

The program first asks you the name of the person whose jar you want. Each family member can have a different jar. Type your name—as many as 8 letters, all CAPITALS. The program then checks to see if there is a job jar on the disk for the name entered. If Job Jar Atari doesn't find a jar matching the name, it creates one and informs you that this is for a new person. Then you are asked for to-

day's date. Enter this in numeric format, MMDDYY. For example, January 3, 1989 would be entered as 010389.

Next comes the main menu. The selections here are A to Add a job, D to Delete a job, L to List all the jobs, and E to Exit. Press A to add the first job to a new jar.

**Don't fish
around in a jar
for the right
chores—let
your 8-bit find
them for you.**

You are now asked for the job's "due date." Enter the date that you want the job to be completed, using the same MMDDYY format as above. Then you are asked for the job's starting priority—the priority this job has RIGHT NOW. Priorities can range from 0 to 9, with 9 being the highest priority. After this, you are asked for the job's ending priority—its priority at due date.

You now type the size (time requirement) of the job, using S for Small, M for Medium, or L for Large. Finally you are asked for a short description of the task—37 characters maximum. Job Jar Atari asks you to confirm your entry. If you type Y for Yes, the job is added to the jar. If you made an error, type N for No. In either case, you are returned to the main

menu.

Make a few entries until you are comfortable with adding to the job jar, then type L to get a Listing of the jobs. You will be asked whether you want the jobs listed in order of entry date, due date, priority, or size. If you choose anything besides size, you will be asked if you want the listing restricted to one size of job.

Finally, you get to choose between having your list displayed onscreen or printed on paper. All printers are supported, if they can be accessed by OPEN and PRINT statements. The program then sorts the jobs according to the order you selected and prints a ranked list reflecting your choices.

When the program ranks by priority, it calculates a priority for the current date. The calculation is based on the starting and ending priorities, date of entry and due date. Priority rises in a straight line connecting the date of entry to the due date, and then levels off if you haven't completed the project by the due date. If a job isn't that high a priority now, but will be later—for example, Christmas shopping—you can structure the job priority to reflect this.

When you type D to Delete a job, you are asked for a "description" of the job you wish to delete. You don't need to type the whole job description, just enough for Job Jar Atari to determine a unique job. Suppose you have two jobs, CLEAN GARAGE and CLEAN BASEMENT. If you want to delete the latter, typing CLEAN B will do it. If the program can't find the job to delete, you will be so informed.

It is important that you use the E command to Exit from Job Jar Atari anytime you delete an entry. Pressing E at the main menu causes the revised file to be saved to the disk if changes have been made. ▲

Macro RESET

Customized command triggering

BY BRAD TIMMINS

Macro RESET is a handy, powerful routine enabling programmers to use the [RESET] key to trigger any command series controlling the BASIC Editor. The BASIC program creates a machine language routine that works on all 8-bit Atari computers of any memory size, with disk drive.

Just about anybody who ever wrote a BASIC program has sometimes wanted to customize the BASIC Editor for various special uses. You might want to change the screen colors, for instance, or change the left and right screen margins. Such changes are quite easy to make—requiring only a few simple POKES. But then if the [RESET] key is pressed, virtually every change made to the Editor will return to its default value.

There have been many machine language routines written that “protect” selected memory locations from being set back to their default values when the [RESET] key is pressed. This makes it easier for you to customize a few aspects of the Editor. But what if you want something more compli-

cated? Maybe you’d like your program to automatically LIST every time you press [RESET]. Or maybe you want [RESET] to automatically SAVE an updated copy of your program?

Macro RESET lets you create your BASIC subroutines which will be RUN every time you press the [RESET] key. In other words, you can now easily program [RESET] to perform any series of BASIC commands you wish.

GETTING STARTED

Type in Listing 1, RESET.BAS, check it with TYPO II and SAVE a copy before you RUN it. When RUN, RESET.BAS creates a machine language program called RESET.EXE. Antic Disk Subscribers will find RESET.EXE on the monthly disk,

along with RESET.M65, the MAC/65 assembly language source code. You do not need RESET.M65 to use Macro RESET.

Don’t try to run Macro RESET from the Antic Monthly Disk. Copy RESET.EXE to another disk that has the DOS.SYS file on it. Then rename RESET.EXE to AUTORUN.SYS.

Turn your Atari off and place your Macro Reset disk into drive 1. Now, turn on your Atari and Macro RESET will automatically load and start. You’ll first see a message telling you that Macro RESET is turned off. Hold down the [OPTION] key and press the [RESET] key to turn it on. Holding down the [OPTION] key and pressing the [RESET] key acts as a toggle switch, turning Macro RESET on and

off.

Let's try a short example. Turn on Macro RESET and type:

```
31000 PRINT "HI, MOM!"
```

Now press the [RESET] key and watch Macro RESET go to work. Whenever you press the [RESET] key, Macro RESET enters two BASIC commands:

```
POKE 842,12:GOTO 31000
```

When BASIC receives these commands, it executes them the same way it would have if you had typed the line and pressed the [RETURN] key.

The first command—POKE 842,12—turns off the Forced Read mode. The second command sends your Atari to your own subroutine. Make sure your subroutine starts at line 31000 and it will automatically execute every time you press [RESET]. Macro RESET uses Page Six, but leaves the first 84 bytes free for your use.

FORCED READ

After Macro RESET prints its two BASIC commands on the screen, it uses your Atari's "[RETURN] key mode" or "Forced Read mode" to enter those commands into BASIC.

If you imagine an invisible finger rapidly pressing the [RETURN] key over and over again, you've got a good idea of what this mode is all about. Next time you use TYPO II, keep an eye on the cursor. After TYPO II calculates a two-letter code for the line you typed, it uses the Forced Read mode to add that line to your program.

Forced Read mode comes in handy when you want a BASIC program to modify itself. The program will PRINT the program line in the middle of the screen, put the cursor at the top of the screen, then use the Forced Read to enter that line into the program. This technique forces the Editor to execute BASIC commands generated by another program. ▲

Brad Timmins of Sandy, Utah has been programming on the Atari for five years. He is making his Antic debut in this issue.

JANUARY 1989

ESCAPE FROM PLANET X

AN EXCITING NEW TEXT ADVENTURE GAME YOU CONTROL WITH VOICE COMMANDS

Escape certain death by scientific experiments! Confront exotic ocelots in alien jungles! Explore the ruins of an ancient alien city! Dig for treasure on far-off islands! Culture! Art! Disease! Asteroids! Violence! Violence in all its forms! Fun violence for kids—more serious violence for adults! Co-Exist with aliens in peace and harmony, or blast them to pieces! Kill aliens named Joe! Symbolic squids! Enjoy lounging around in a swivel chair! Die of explosive decompression! Have fun exploring Planet X! Then have fun blowing it up! *Escape from Planet X and win!*

HARDWARE INCLUDED

Naturally, if you want to talk to your Atari, you'll need some hardware. So, with *Escape from Planet X* you'll also receive the amazing Voice Master Junior speech digitizer and utility software! With it, you can easily add speech playback or voice recognition commands to Atari Basic. Play back speech that you recorded in your own voice! Use the Speech Editor program to alter your speech waveforms. Also included is a talking calculator, a talking clock, and a Las Vegas style talking and listening Black Jack game! And if that's not enough, you also get the Music Composer. This incredible program plots out musical notes as you whistle your favorite melody, and when finished, prints out the final score in standard musical notation. *The one low price of \$49.95 gets you the works.* For 8-bit Atari computers. Software supplied on disk.

Escape from Planet X is included with the purchase of Voice Master Junior. Available separately for only \$19.95 (plus \$2 shipping costs). Game can be played with keyboard only.

ORDER HOTLINE: (503) 342-1271

Bismarck, Judge, Jumpstart, SPI

BISMARCK

Bismarck: The North Sea Chase is Datasoft's entry into the realm of war simulations, a battlefield dominated by SSI. And while SSI's game design is not bettered on every front, *Bismarck* does have a couple of advantages.

This program recreates the historic 1941 sea battle between the British ship *Hood* and Germany's *Bismarck*. History tells us that the *Bismarck* sank the *Hood* with all hands. This game lets you change history as well as experience the battle from either side. And if you get tired of sea battles, launch a Swordfish torpedo plane from a carrier and try your luck at an airstrike.

Newcomers will appreciate the arcade-like simplicity of play. The graphics-oriented control interface lets you initiate commands as easily as on the Macintosh or ST—just point and select with the joystick. Though this isn't as fast as a mouse, it's still quick and easy to learn and use.

The manual, critical in a simulation, is rather slight. While it does index and cover every aspect of the game, the exact operation of some commands are not spelled out precisely and completely. This could discourage those beginners to whom the game caters. The graphics are standard fare, and while the screen updates quickly, the program execution is chained to the chugging disk drive, which must be accessed to load new code whenever you enter a different command mode.

Overall though, *Bismarck* is worthy of consideration. It's a good introduction to simulations, teaching the basic concepts of a complex game genre

in an arcade framework.—STEVE PANAK

\$29.95, 64K disk. Datasoft, 19808 Nordhoff Place, Chatsworth, CA 91311. (818) 886-5922

THE JUDGE

Can your computer make your decisions for you? The somewhat scary answer is, yes. And it can do a better job than you can.

As far as I know, *The Judge* is the only decision-making commercial software available for the 8-bit Atari, although there are many similar programs on other computers. The Judge is amazingly flexible and can handle extremely complex problems. It can also be used for scoring contests. Its power really begins to show when you have several contestants being judged on several factors, by several judges.

Like most computer applications, *The Judge* is more work than it's worth for simple problems. But for difficult dilemmas, or repetitive problems, it's worth its weight in silicon chips.

First, you must define the question for *The Judge*. You lay out all the options, all the factors to take into account, and the relative importance of the factors. Then you evaluate each of the factors for each of the options. The Judge evaluates your input and rates the options and gives you the scores. It sounds simple, but it's actually pretty subtle. The results will surprise you. The Judge will often rate things differently than your intuitive feelings did.

The Judge is not easy to use. It has

an interface only a programmer could love, full of cryptic abbreviations. But once you learn it, you can move around pretty fast in the program. Also, since it's written in BASIC, you can go in and redesign it to your own preferences.

Should you follow *The Judge's* advice? Well, my daddy always said when you need to decide, promise to abide by the results of a coin toss. When the coin hits the ground, you'll know what you really want to do. Do that.—CHARLES CHERRY

\$39.95, 48K disk. Mead Micro Ware, 10 Bonito Place, Los Alamos, NM 87544. (505) 662-9475.

JUMPSTART MODULE, ENHANCEMENT DISK

When you "warmstart" your Atari by pressing the [RESET] key, the computer goes through a number of processes. When you "coldstart" your Atari by turning the computer off and back on again, it does all the warmstart processes plus a few more—including erasing the main memory and rebooting the disk drive. (During a warmstart, the program in memory can reboot the drive.) A coldstart switch like the **Jumpstart Module** (\$18.95) lets your Atari XL/XE perform all its coldstart routines *without* being turned off.

Even though your Atari has a perfectly good on/off switch, there are several reasons to install a coldstart switch. You'll reduce electrical stress on the computer by eliminating some power cycling (turning the computer off and back on). You'll extend the life of the on/off switch. The switch is in

a more convenient location. And on expanded memory XLs, you eliminate the 15 second wait while the memory drains out.

But all these reasons are minor. The real reason for a coldstart switch is to preserve the contents of your RAMdisk during reboots. The operating system erases only the main memory during a coldstart—not the extended memory. That gets erased only when the power is turned off. If you coldstart without turning off the power, the extended memory is protected.

For example, as a coldstart switch user you could draw a picture with a paint program, save it instantly to the RAMdisk, reboot with your graphics printing program, load your picture instantly from the RAMdisk and print it. Very convenient.

The Jumpstart Module is a cartridge with a small push button on the top. Although it plugs into the cartridge slot, it uses no memory. The module works as advertised. You simply hold down that button and press [RESET]. It's more convenient on the 800XL than the XE because of the location of the cartridge slots. Unfortunately, you can't use the Jumpstart Module with other cartridges.

The Jumpstart Module works by telling the OS that a cartridge has been inserted. That forces a coldstart, but it can also confuse the computer about the cartridge status. Sometimes this causes a problem and you must press [RESET] again. To prevent confusion, I find that an always reliable method is to press [RESET] a second time (without the Jumpstart switch) as soon as the disk starts to spin.

The Jumpstart Module is not exactly the same as a hardware generated coldstart. The Jumpstart Module uses the OS to reset the computer. In a very severe program crash, the OS might not be able to regain control. A true hardware reset, like turning the computer off, then on again, will always reset the computer.

The **Enhancement Disk** (\$7.95), another Logic One product, supplies

useful patches to DOS 2.5 and SpartaDOS so they won't reinitialize (and erase) the RAMdisk while booting. The patches don't change the LOMEM pointer and should not cause compatibility problems with other programs. Another program on the disk displays the contents of individual sectors of DOS 2.5 or SpartaDOS RAMdisks.

If you use a RAMdisk, you need a coldstart switch. If you have expanded your memory, you really need one. The Jumpstart Module is a practical, inexpensive solution.—CHARLES CHERRY

\$24.95 for Jumpstart Module plus Enhancement Disk, XL/XE. Logic One, P.O. Box 18123, Cleveland, OH 44118.

SPI GAMING LANGUAGE

Designing a programming language is the toughest thing you can do on a computer. It is maddeningly difficult to balance features with performance. No matter what you do, some will hate it, others will be indifferent, and only a few will be enthusiastic. But every language enriches the programming environment and all programmers are forever looking for a language which will fit them better. I think Steven Bennett's **SPI** may be a little lean on features, but I'm sure it is just what some programmers are looking for.

SPI is designed for three things—speed, speed, and more speed. To achieve speed, it is stripped to the

bare bones. It supports only integer numbers. Graphics 0 and 12 (ANTIC 4) are the only modes supported, but you can mix them in the display list. Screen writing is done directly to screen memory. Most special operations like reading joysticks or moving players are done by directly manipulating memory.

Whoa! Did I say Graphics 0 and 12? Those are both text modes. How can you write a game with them? Actually, almost all games, from Pac Man to Pharaoh's Curse, are done in text modes with redesigned character sets. Text modes are the fastest and use the least memory. I only wish more text modes were supported.

Program control includes equivalents to GOTO and GOSUB as well as IF..THEN..ENDIF and WHILE. . .ENDWHILE. The IF statement supports only one conditional, but you can have multiple lines of instructions between THEN and ENDIF. SPI uses ;IF for ENDIF.

I/O supports input from the keyboard as well as block reads and writes to a disk file. There is no READ. . .DATA structure. Strings and Arrays are supported as simple blocks of memory. You must calculate the offsets. Arithmetic is limited to the four basic functions (+-*/) and there are no Boolean operators.

My biggest disappointment with SPI is that variable names are limited to single letters (and therefore 26 variables) and line labels are limited to numbers between 1 and 32. That, combined with all the memory addresses, produces code which is very hard to understand. It is definitely not self-documenting.

The two most unusual things about SPI are that it requires Atari BASIC and comes on a DOS 3 disk. I assume that SPI is stealing some of the high-speed code in Atari BASIC, but I can't think of a single reason for DOS 3.—CHARLES CHERRY ▲

Joystick Oki Draw

FROM SCREEN TO OKIMATE 10, IN NINE COLORS,

By Denis Schaffer

Joystick Oki Draw is a simple, effective nine-color drawing program that makes printouts on the inexpensive Okimate 10 color printer. This BASIC program works on all 8-bit Atari computers of any memory size. Saving your pictures requires a disk drive.

Use Joystick Oki Draw to paint color pictures on your 8-bit Atari computer screen. And then effortlessly print them out on Okidata's affordable Okimate 10 color printer. You can choose from nine colors—red, orange, yellow, green, blue, purple, white, black and grey.

You also have the choice of two drawing modes. Mode 1 gives you the equivalent of a Graphics 5 screen—80 columns X 48 rows. Mode 1 is especially good for small children because it is easier to use, and the screen dumps are a full page wide.

Mode 2 gives you the total Graphics 10 screen—80 columns X 192 rows. Mode 2 is better for creating fairly detailed drawings and is also more useful if you want to make a number of identical pictures for invitations or announcements, etc. That's because

can print two identical pictures side-by-side, without using any additional time or color ribbon.

To print mode 2 pictures side-by-side, in program line 40 change SIDE=0 to SIDE=1.

GETTING STARTED

Type in Listing 1, COLOR.BAS, check it with TYPO II and SAVE a copy before you RUN it. When Joystick Oki Draw starts, you'll see a each mode 2 picture occupies slightly less than half the page width. So with a slight program modification, you brief set of instructions and then you will be prompted to choose mode 1 or mode 2.

After you type a number, you will be prompted to type the filename for saving and/or loading a picture. If you just press the [RETURN] key, the de-

fault name is DRAWFILE. After you type a filename, the screen will appear with the paint cursor flashing in the center. In the upper right corner, the white dot represents the size of the cursor.

Move the joystick in any direction to move the paint cursor. If you want to erase something, simply hold down the joystick button while moving the cursor over whatever you want to erase. To change to another color, press the [SPACEBAR] until the cursor is the color you want.

To clear the entire screen and start over again, press the [TAB] key twice. To move the cursor to a new position without erasing or drawing over anything on the screen, press the [INVERSE VIDEO] key at the lower right corner of the keyboard. The cursor will stop flashing and can now be moved without affecting the current screen. After you reposition the cursor, press the [INVERSE VIDEO] key again and resume drawing.

SPECIAL FEATURES

If you want to slow down the cursor, press [<]. Pressing [SHIFT] [<] makes the cursor move at its slowest speed. If you want a faster cursor, press [>]. To make the cursor move at its fastest speed, press [SHIFT] [>>].

If you are in mode 2, you can change the size of the cursor. Pressing [+] increases the size of the cursor. Pressing [SHIFT] [+] increases the size of the cursor to its maximum.

Joystick Oki Draw lets you create color pictures and print them on your Okimate 10 color printer.

An image created with Joystick Oki Draw (above) and a printout (below).

Pressing [-] decreases the cursor size and pressing [SHIFT [-] decreases the cursor to its smallest size.

To save a file to disk, press [S]. This will save the file under the name given when the program was first started. To load a file from disk, press [L]. This overwrites whatever is currently on-screen.

Finally, press [P] to print a hardcopy of the onscreen picture. The Okimate 10 color printer is the *only* printer that works with Joystick Oki Draw. Make sure that the Oki 10 is turned on and that there is a color ribbon in it.

PROGRAM TAKE-APART

Lines 50 to 290 contain the instructions to make the cursor move and draw. Line 280 checks to see if any keys have been pressed.

Lines 300 to 370 set up the variables and screen.

Lines 380 to 470 are the Oki 10 screen dump for mode 1.

Lines 480 to 620 are the screen dump for mode 2.

Lines 630 to 790 check which key has been pressed and perform the appropriate instruction. If the instruction is to save or load from a disk or to perform a screen dump, the screen is turned off by POKEing a 0 into address 559. This causes the computer to work slightly faster. After the operation is finished, the screen is turned back on by POKEing the appropriate number into address 559.

Line 800 decreases the width of the cursor.

Line 820 increases the width of the cursor.

Line 840 changes the color of the cursor.

Lines 890 to 910 are used to clear the screen. Line 900 checks to see if the [TAB] key has been pressed a second time. Otherwise the command is ignored.

Lines 920 to 1060 print the instructions and get the mode number.

Lines 1070 to 1110 get the name of the file that is to be used by the program.

Lines 1120 to 1160 save a picture to disk.

Lines 1170 to 1230 load a picture from disk. ▲

Denis Schaffer is a Civil Engineer who wrote this program while at MIT obtaining his M.S. graduate degree.

Listing on page 69

Saucerian Shootdown

They don't seem hostile, but . . . *By James Catalano*

SAUCERIAN SHOOTDOWN IS A speedy missile-firing game as straightforward as its title. This BASIC program works on 8-bit Atari computers with at least 32K memory, disk or cassette.

During your duty shift at the security console monitoring the outer sectors surrounding the military outpost on planet Traken, your scanners report several unidentified objects moving erratically in and out of Quadrant 24. Checking your databases, you find that no maneuvers are planned for that quadrant today. You quickly dispatch an Occuloid Trackship to investigate.

Arriving at the scene, the Occuloid's camera reveals strange saucer-

like objects darting about. You switch onto a general broadcast hailing frequency and try to communicate with the saucers. There is no response.

Although the saucers don't appear to be hostile, they might well be remote-controlled spy devices from some other planet. You can't take chances with the security of this remote military base. If these saucers won't answer your communications, you will send an Automated Missile Launcher to shoot them

down.

Type in Listing 1, SAUCER.BAS, check it with TYPO II and SAVE a copy before you RUN it. If you have trouble typing the special characters in lines 20060-20075, don't type them in. Instead, type in Listing 2, check it with TYPO II and SAVE a copy. When you RUN Listing 2, it creates these hard-to-type lines and stores them in a file called LINES.LST.

To merge the two programs, disk users LOAD "D:.BAS" and then ENTER "D:LINES.LST." Cassette users: CLOAD Listing 1, then insert the separate cassette used for Listing 2 and ENTER "C:". Remember to SAVE the completed program before you RUN it.

Move the joystick to shift the Automated Missile Launcher left or right across the bottom of the screen. Press the joystick button to launch a missile. You score 100 points for every hit, plus a bonus of 1000 points for every 5 saucers destroyed.

You can only hit a saucer when it is directly above your Launcher. When a saucer is targeted accurately, its color will turn white. The Launcher is armed with 50 missiles. The game ends when all missiles have been fired. ▲

James Catalano of Chicago is the programmer of Sorcerer's Apprentice, which was Antic's September 1988 Game of the Month.

Mighty Lister

Mighty Mailer becomes an inventory database,

BY PHILIP BATE, Ph.D.

Mighty Lister is a short patch that converts Antic's popular 1987 Mighty Mailer software into a fast, powerful inventory database. This BASIC program works on all 8-bit Atari computers of any memory size, with disk drive.

Need a program for a specialized job? Your **Antic** Magazine files probably have programs that are at least close to what you want. Or maybe there are a few good machine language subroutines in these files that you could incorporate into a simple BASIC program that you write to do the job.

I needed a program to keep track of an inventory of spare parts along with where they were stored, plus a video tape inventory to find recordings quickly. I looked at several databases ranging from the very versatile but somewhat complex Antic Data-X (Super Disk Bonus, May 1988), right down to the simplest filing programs. They were either too complicated and time-consuming, or too simple with slow recall.

But as the author of *Mighty Mailer* (**Antic**, September 1987), I thought I

might be able to re-write it for what I wanted. *Mighty Mailer* has a fast random access subroutine in machine language and a simple I/O subroutine. Both of these would be necessary for what I wanted.

The first step was to LIST the program file to a word processor and make a printout. I then went over it to see what needed changing for conversion into an inventory control database. I was surprised to find that I could even use *Mighty Mailer* without changing it at all, because it already operates as a database. But, since I had several new jobs for the program, I decided to modify it into a separate listing.

Mighty Mailer has now become a very fast inventory program, with the same lightning recovery speed as the original mailing-list printer. Mighty

Lister can be used to inventory almost anything—from the contents of record albums or video tapes to spare parts in a specific part of a warehouse.

I use Mighty Lister to inventory all the spare parts carried aboard a world cruising yacht, cross-referencing each spare part with its exact location on the yacht. Using Mighty Lister, I can scroll by item, by part number or by partial description. I can also list out all the spares stored in the forward starboard hatch, etc.

Mighty Lister is not just an inventory program. It's a fast and simple database for use in standard record-keeping tasks. How often do you need a very complex database, instead of one that just makes it easy to keep track of office furniture or warehouse inventory, or even home uses like music cassettes or video tapes?

GETTING STARTED

Owners of this month's Antic Disk will find the complete Mighty Lister available as LISTER.BAS.

If you already have *Mighty Mailer*, but do not own this month's Antic Disk, you can just type a short patch and merge it into your original listing. Do this by typing Listing 1, LISTRMOD.LST, check it with TYPO II and LIST it to disk under the filename "D:LISTRMOD.LST". LOAD your original *Mighty Mailer* program and ENTER "D:LISTRMOD.LST". Be sure to SAVE the merged file back to disk as "D:LISTER.BAS."

We also published Mighty Lister as a standalone type-in listing in this issue. Type Listing 2, LISTER.BAS, check it with TYPO II and SAVE a copy before you RUN it. If you have trouble typing the special characters in lines 70-84, don't type them in. Instead, type in Listing 3, check it with

TYPO II and SAVE a copy. When you RUN Listing 2, it creates these hard-to-type lines and stores them in a file called LINES.LST.

To merge the two programs, LOAD "D:LISTER.BAS" and then ENTER "D:LINES.LST." Remember to SAVE

is the end of the desired entry. This cute backjumping trick lets you find a complete name/address entry in any portion of the entry.

But, for an inventory list with short entries, this means that the wrong entry could be printed. So, I changed

Mighty Lister is just as simple to use as Mighty Mailer

the completed program before you RUN it.

The modification process was not too difficult. Many of the changes are simply cosmetic. Title changes for items such as names/addresses are self explanatory when compared to the original listing. I didn't bother to change the REMs, which purists will probably want to do.

However, there are a few modifications that need explanation. I like a title page, so I added lines 33 and 36. Since this is now an inventory program, a routine is needed to print listings from any specific locator. For example, suppose I want to find out the contents of Bin 4 in the warehouse. I want to enter that storage identifier and print all items found in that location. This was simple because the subroutines were pretty much in place already. I just had to add lines 282, 284 and 286.

MAJOR CHANGES

One other significant modification was required. The Search Subroutine at lines 1150-1200 was designed for names and addresses on a mailing list, so it "jumps" backwards 30 spaces after finding the locator match, and then looks forward from that point to find the "next" double carriage return at the beginning of the desired entry. The following double carriage return

line 1160 so that the "jump" backwards is only 10 characters. If your entries are very short, you might wish to shorten that jump even further by changing the number after the "-" sign in that line.

Mighty Lister is just as simple to use as *Mighty Mailer* was. Any entry is limited to 255 characters—letters, numbers, or symbols. Press the [RETURN] key twice to separate entries. Otherwise, if you just follow the menu choices you should be able to operate Mighty Lister without problems. If you need more detailed instructions, see the original *Mighty Mailer* article on pages 30-32 of the September 1987 *Antic*.

The important principle here is that two seemingly different applications were really very similar. Look at program listings to try figuring what they really do logically. This could give you ideas of how to use them in completely different applications. *Mighty Mailer* is only superficially a mailing program, it is actually a mini database program structured for mailings. When you examine the logical structure of "old" programs this way, you might find many exciting "new" uses for them. ▲

SHOPPERS GUIDE

ANTIC'S SEVENTH ANNUAL

Yes, there *are* still 8-bit products out there—more than 275 on our chart!

BY GREGG PEARLMAN, ANTIC ASSISTANT EDITOR

Antic's Seventh Annual Shoppers Guide to products for the 8-bit Atari computers is a little bit different from the guides we've done previously. This year we put together a chart that attempts to briefly describe *every* 8-bit software and hardware product available in the market during the 1988 holiday season.

We can't guarantee that the chart is 100% complete. But that's what **Antic** was striving for and we think we came pretty close—maybe as much as 95% of the original standalone products. (We did not attempt to list *every* add-on or variation for the

main products.) If any significant omissions are discovered, **Antic** will publish a mid-year update chart this spring.

According to the 1988 **Antic** Reader Survey, finding good software is the biggest concern of most 8-bit users. We didn't think anybody really knows how much 8-bit software is still available out there. Certainly the editors of this magazine didn't know. So for the new Shoppers Guide, we decided to try finding out. . .

A happy coincidence helped **Antic** with the formidable task of surveying all independent products for the 8-bit

Atari. Charles Cherry had just rejoined **Antic** Software to expand the 8-bit catalog product line. His first task was to contact all past 8-bit publishers to discover what discontinued high-quality commercial software might be available for reissue. Cherry's in-depth field research saved **Antic** editors weeks of work in finding information for the chart.

You can read more about the revived 8-bit **Antic** Arcade catalog elsewhere in this issue. And when you see products on the chart marked with an asterisk *—it means they are *already* available from the catalog!

USING THE CHART

The Shoppers Guide Chart is arranged in major product categories, similar to our past guides. Within each category, products are listed alphabetically by title. Complete addresses and phone numbers for the makers of each product are listed alphabetically in a separate directory following the main chart.

Unless otherwise stated, the charted products should run on all Atari 8-bit computers with at least 48K memory. Other usual requirements are a joystick and color TV (or composite color video monitor, or monochrome monitor).

Although it was sad to find that some of the best 8-bit products from the past are currently out-of-print, we came across many pleasant surprises

while preparing the **Antic** chart. For example, some 20 SSI role-playing strategy games are still distributed by Electronic Arts.

With more than 275 listed products available *right now*, all 8-bit users should be able to find something that satisfies their needs. And with the **Antic** Arcade 8-bit catalog back in high gear, look for much more on the way.

HARDWARE ENHANCEMENTS

FA-ST Hard Disk	\$699	ICD	Powerful and dependable 20Mb data storage. It really is fast, too
Fastchip	\$19.95	NEWELL	Speed up floating point routines 300%
Function Key Kit	\$14.95	INNOVATIVE CONCEPTS	Gives XL/XE models the F1-F4 keys found on the 1200XL
ICX-85 Keypad	\$44.95	INNOVATIVE CONCEPTS	Enhanced 10-key number pad
MFM Hard Drive Kit	\$289.95	ICD	MFM controller for 5 1/4 inch, 8-bit hard disk
MPP-1150 Interface	\$59.95	SUPRA	Dependable connection between your 8-bit and standard printers or modems
Microprint printer interface	\$49.95	SUPRA	Hook up your Atari to standard printers
Modem Mouth	\$19.95	INNOVATIVE CONCEPTS	Add an external speaker to your modem
Multi I/O (256K)	\$239.95	ICD	Turn your XL/XE into a multi-function workstation rivaling the ST in power
Multi I/O (1Mb)	\$469.95	ICD	Four times the memory as the regular model above
Omniview XL/XE	\$39.95	NEWELL	Gives you 80 readable columns onscreen
Omniview 256	\$39.95	NEWELL	80 Columns for 256KXL upgrade
OSNXL OS chip	\$49.95	NEWELL	Versatile operating system chip
PowerManager *	\$24.95	TERRIFIC	Control your household appliances automatically using widely available X-10 modules
P:R: Connection	\$89.95	ICD	Popular replacement for the Atari 850 interface
Printer Connection	\$59.95	ICD	P:R: Connection's little brother
RAMbo XL	\$39.95	ICD	Turn your XL into a 256K monster
RAMrod	\$79.95	NEWELL	Operating system board that accepts EPROMs or standard OS ROMs
RAMrod XL	\$79.95	NEWELL	Allows three different operating systems
RLL Hard Drive Kit	\$339.95	ICD	RLL controller for 5 1/4-inch, 8-bit hard disk
SIO Port Box	\$24.95	INNOVATIVE CONCEPTS	Eliminate the "dead-end peripheral" problem
SIO Switch Box	\$34.95	INNOVATIVE CONCEPTS	Hook up two computers to one drive setup—or vice versa
1050 Controller	\$21.95	INNOVATIVE CONCEPTS	Gives your 1050 write-on/off and normal modes

20 Meg Hard Drive	\$699	SUPRA	Proven dependable performer for the 8-bit
256KXLLM	\$39.95	NEWELL	256K RAM upgrade
Ultra-Speed Plus Chip	\$69.95	CSS	Three operating systems in one
US Doubler with SpartaDOS	\$69.95	ICD	High-speed disk I/O, true double density
XEP-80 *	\$79.95	ATARI	The box that brings 80 columns of crisp text and graphics to your screen

SPEECH/SOUND

Parrot II	\$59.95	ALPHA	Hardware/software sound digitizer
Pre-Recorded Parrot Sounds	\$4.95	ALPHA	Digitized sound files for Parrot II
Voice Master Jr.	\$49.95	COVOX	Powerful sound digitizer includes Escape from Planet X game

GRAPHICS

Animation Station	\$89.99	SUNCOM	KoalaPad-like graphics tablet with software
Blazing Paddles	\$34.95	BAUDVILLE	Powerful drawing/painting software
ComputerEyes	\$129.95	DIGITAL VISION	Hardware/software video image digitizer
Desktop Performance Studio	\$49.95	VIRTUSONICS	Unique concept blends music, animation and art
Graphics Transformer	\$22.95	ALPHA	Combine and merge pictures from different paint programs
Video Title Shop	\$29.95	DATAMOST	Creates animated titles for video tapes. Optional \$19.95 Graphics Companion

EDUCATION

ACLS Protocols	\$29	MAD SCIENTIST	Medical simulation software
Addition and Subtraction	\$29.95	MINDSCAPE	Help with math
Astro-Grover	\$9.99	HI-TECH	Colorful preschool software in Sesame Street series
Big Bird's Special Delivery	\$9.99	HI-TECH	Preschool Sesame Street software
Biology	\$19.95	AEC	Biology tutor
Blood Gases	\$24	MAD SCIENTIST	Medical simulation software in Cardiac Arrest! series
CAMP	\$19.95	XLENT	Computer Assisted Math Program help
Cardiac Arrest!	\$69.95	MAD SCIENTIST	Find out how well you can run a simulated emergency room
Cardioquiz	\$19	MAD SCIENTIST	Medical quiz in Cardiac Arrest! series
Decimals: Addition and Subtraction	\$29.95	MINDSCAPE	Math drill help. Multiplication and Division disk is also \$29.95
EKG Teaching	\$29	MAD SCIENTIST	Medical simulation software in Cardiac Arrest! series
Ernie's Big Splash	\$9.99	HI-TECH	Preschool software in Sesame Street series
Ernie's Magic Shapes	\$9.99	HI-TECH	Preschool software in Sesame Street series
Foreign Language Curriculum	\$59.95	AEC	Foreign language skills tutor
Fractions: Addition and Subtraction	\$29.95	MINDSCAPE	Multiplication and Division disk is also \$29.95

French	\$19.95	AEC	French language skills tutor
Geography Facts Curriculum	\$49.95	AEC	Geography tutor
Grammar	\$19.95	AEC	Brush up on grammar skills
Grover's Animal Adventures	\$9.99	HI-TECH	Sesame Street preschool software
History Facts Curriculum	\$49.95	AEC	On-disk history teacher
Learn to Read Curriculum	\$39.95	AEC	Reading program
Linkword Languages	\$24.95	ARTWORX	Vocabulary memorization series available in German, Italian, Spanish
Mastertype Filer	\$29.95	MINDSCAPE	Typing tutor
Math Blaster	\$49.95	DAVIDSON	Math tutor with arcade atmosphere
MonkeyMath	\$19.95	ARTWORX	Help with math
MonkeyNews	\$19.95	ARTWORX	Early educational software
Multiplication and Division	\$29.95	MINDSCAPE	Help with math
New Improved Mastertype	\$39.95	MINDSCAPE	Arcade-like typing tutor
Pals Around Town	\$9.99	HI-TECH	Early educational software
Pic Builder	\$29.95	WEEKLY READER	Learn to draw onscreen
Quizmaster Construction Set	\$11.50	EZUSE	Create any kind of multiple choice quiz
Reading Fundamentals Curriculum	\$99.95	AEC	On-disk reading program
Science 3/4, 5/6, 7/8	\$19.95 each	AEC	Science tutors for various grades
Science Facts Curriculum	\$89.95	AEC	Science help for students and teachers
Sesame Street Print Kit	\$14.99	HI-TECH	Flashy page design software disguised as a kid's program
Spanish	\$19.95	AEC	Spanish language skills tutor
Spell It	\$49.95	DAVIDSON	Spelling tutor
Spelling Curriculum	\$39.95	AEC	Spelling program for students and teachers
Spelling Curriculum	\$49.95	AEC	Spelling program for students and teachers
Stickybear ABC	\$19.95	WEEKLY READER	Beautiful animated pictures teach the alphabet to kids Ages 3-6
Stickybear Basket-Bounce	\$19.95	WEEKLY READER	Rack up points by catching falling objects. Fun for all family
Stickybear Bop	\$19.95	WEEKLY READER	Family fun. Rack up points by bopping things
Stickybear Numbers	\$19.95	WEEKLY READER	Animated counting game for ages 3-6
Stickybear Opposites	\$19.95	WEEKLY READER	Big colorful animations introduce reasoning skills, ages 3-6
Stickybear Shapes	\$19.95	WEEKLY READER	Learn circles, rectangles, etc. and win an animation. Ages 3-6
Typing Tutor/Word Invaders	\$24.95 disk	ACADEMY	Arcade-like typing teacher
U.S. Geography	\$19.95	AEC	Build up your knowledge of geography
U.S. Government	\$19.95	AEC	Know how your country works
U.S. History	\$19.95	AEC	Know what happened, and when
USA Construction Set	\$11.50	EZUSE	Clever, thorough geography questioner
Vocabulary	\$19.95	AEC	Everything you want to know about each state, in quiz form
Word Attack	\$49.95	DAVIDSON	Vocabulary builder

Word Skills Curriculum	\$49.95	AEC	Vocabulary builder
World Geography	\$19.95	AEC	Geography drill program
World History	\$19.95	AEC	History drill program

COMMUNICATIONS

BBS Express!	\$39.95	ORION	Popular 8-bit bulletin board program
BBS Express! Professional	\$49.95	ORION	Excellent upgrade, needs a hard disk and SpartaDOS
Express!	\$39.95	ORION	Top 8-bit telecommunications program

LANGUAGES/TOOLS

ACTION!	\$79.95	ICD	50 to 200 times faster than BASIC
ACTION! RunTime Package	\$29.95	ICD	Make ACTION! programs that run without the cartridge
Advan BASIC *	\$29.95	ADVAN	High-powered compiled BASIC language
BASIC Turbocharger	\$24.95	ALPHA	Book/disk of machine language routines for BASIC
BASIC XE	\$79.95	ICD	Uses the extra memory in your 130XE
BASIC XL	\$59.95	ICD	IF . .ELSE, RENUMber commands and more. \$29.95 ToolKit includes RunTime Package
Diamond OS	\$29.95	USA MEDIA	ST-like desktop operating environment
Diskwiz	\$29.95	ALLEN	Top-class sector editor—an old favorite
DISKIO	\$32.95	CLEARSTAR	Top-class sector editor—a new favorite
GOE Desktop	\$59.95	TOTAL CONTROL	ST-like desktop operating system on cartridge
HardBack!	\$39.95	ORION	Back up your hard disk fast
Kyan Pascal	\$69.95	KYAN	Solid 8-bit Pascal language implementation
Lightspeed C	\$39.95	CLEARSTAR	Hot new 8-bit C language implementation
Lightspeed Windows	\$24.95	CLEARSTAR	Windowing utility for Lightspeed C
MAC/65	\$79.95	ICD	Super-fast machine language assembler
MAC/65 ToolKit	\$29.95	ICD	Save hours of work with add-on macros
MYDOS	\$29.95	NEWELL	Operating system has the serious user in mind
R-Time 8	\$69.95	ICD	Clock cartridge used with SpartaDOS
RAM-Aid	\$15.95	INNOVATIVE CONCEPTS	Coldstart switch for memory-upgraded computers
SBM	\$99.95	NEWELL	Inventory control/point-of-sale program. SBM 130 is XE version, also \$99.95
Scanalyzer	\$29.95	ALPHA	Single-pass sector copier
Screen Design *	\$24.95	ADVAN	Paint program for Advan BASIC
SCXM sector copier	\$17.95	NEWELL	For 256KXL upgrade
SD/DD sector copier	\$17.95	NEWELL	Make up to 153 copies and read the source disk just once
SpartaDOS Construction Set	\$39.95	ICD	Operating system that's the favorite of memory upgraders and hard disk owners
SpartaDOS ToolKit	\$39.95	ICD	SpartaDOS utility package

SpartaDOS X	\$79.95	ICD	SpartaDOS on a cartridge leaves you more memory
SuperDOS *	\$20	TECHNICAL SUPPORT	Easy, powerful DOS 2.5 variation
Ultra Menu/DOS	\$29.95	CSS	Convert single density to double, ect.

PRINTING

AwardWare	\$14.99	HI-TECH	Print awards, certificates
Billboard	Shareware	SHEPHERD	B-I-G printouts
CardWare	\$9.99	HI-TECH	Nifty card-printing software
Daisy-Dot II	\$10	ROY GOLDMAN	Fancy fonts and graphics for your dot matrix printer
Icon Disk	\$19.95	XLENT	For Typesetter and Rubber Stamp
Magniprint II+	\$24.95	ALPHA	Print in all Graphics modes
Megafont II+	\$24.95	XLENT	All-around printing utility
Newsroom	\$49.95	SPRINGBOARD	8-bit desktop publishing software
News Station	\$29.95	REEVE	8-bit desktop publishing software
News Station Companion	\$29.95	REEVE	Images for Reeve News Station
Page Designer	\$29.95	XLENT	8-bit desktop publishing software
PartyWare	\$14.99	HI-TECH	Print invitations and more
Picture Disk	\$19.95	XLENT	For Typesetter and Rubber Stamp
Print Shop	\$24.95	BRODERBUND	Still the number one printing program
Print Shop Companion	\$34.95	BRODERBUND	More tools for Print Shop
Print Shop Fonts & Borders 1-5 *	\$14.95 each	NO FRILLS	Series of original designs for Print Shop
Print Shop Interface	\$29.95	XLENT	Convert images between P.S. and XLENT's print programs
PrintPower	\$14.99	HI-TECH	Easy page design like Print Shop
Printwiz	\$29.95	ALLEN	Powerful and versatile printing utility
Publishing Pro	\$39.95	REEVE	Desktop publishing software
Quik-Pix	\$29.95	WHITE LION	Converts Print Shop icons for use in AtariWriter Plus files
Quik-Pix PC	\$29.95	WHITE LION	Converts Print Shop icons for PaperClip files
Rubber Stamp	\$29.95	XLENT	Puts graphics and text on the same page
Rubber Stamp Graphics Library	\$29.95	WHITE LION	Visual images for XLENT's Rubber Stamp
Schematic Designer	\$24.95	ALPHA	Create the electronic gadgets of your dreams
Super 3-D Plotter II *	\$29.95	ELFIN MAGIC	Outstanding solid modeler drawing tool
Typesetter	\$34.95	XLENT	Full-featured page designer software
Typesetter Graphics Library	\$26.95	WHITE LION	Graphics for XLENT's Typesetter
Video Juke Box	\$10	SHEPHERD	Flashy screen displays using Print Shop graphics

WORD PROCESSING

First XLEnt Word Processor	\$29.95	XLENT	One of the best available today
Letter Perfect	\$49.95	LJK	Still a good tool

Richman's 80-Column Word Processor	\$39.95	CSS	All-software 80-column program
TurboWord 80 *	\$49.95	MICROMISER	80-column word processor compatible with Turbobase

PRODUCTIVITY

Celebrity Cookbook	\$29.99	USA MEDIA	Recipes and diets of famous people
TurboBase *	\$159.95	MICROMISER	PC-Quality business database
TurboBase 80 *	\$179.95	MICROMISER	High-powered 80-column database for business
Circuit Database	\$12.95	ELFIN MAGIC	Fine 8-bit database
Data Perfect	\$79.95	LJK	Old favorite 8-bit's best database
Elite Personal Accountant	\$39.95	CLEARSTAR	Home finance manager
InSyst	\$34.95	SOSOFT	Personal accounting software
Loan Department	\$69.95	LJK	Play "What if?" with loan possibilities
Maillist	\$19.95	ARTWORX	Mailing list software
Megafiler	\$19.95	XLENT	Database/mailling list software
Miles Payroll System	\$99.95	MILES	Small business payroll program

MUSIC

CZ Librarian *	\$39.95	HYBRID ARTS	Patch filer for Casio CZ keyboards
DX Editor	\$59.50	HYBRID ARTS	Shape sounds for Yamaha DX keyboards
DX Librarian *	\$59.95	HYBRID ARTS	Save patches for Yamaha DX keyboards
GenPatch	\$74.50	HYBRID ARTS	Versatile patch editor
Guitar Wizard	\$29.95	BAUDVILLE	Learn to play the guitar, find chords fast
MidiTrack II *	\$174	HYBRID ARTS	Hardware/software system makes your XL a MIDI recording studio
MidiTrack III *	\$187	HYBRID ARTS	128K version of the above, for 130XE only
Mirage Editor (130 only)	\$93.50	HYBRID ARTS	Shape sounds for Ensoniq synthesizers
Music Construction Set	\$14.95	ELECTRONIC ARTS	Well-known music creator, uses standard notation

ENTERTAINMENT

Alternate Reality: City	\$29.95	DATASOFT (EA)	Vast-scale graphic adventure
Alternate Reality: Dungeon	\$29.95	DATASOFT (EA)	Colorful sequel to Alternate Reality
Autoduel	\$39.95	BRODERBUND	Road Warrior time, and you're the good guy
Battle of Antietam	\$49.95	SSI (EA)	Re-create this classic Civil War battle
Beach-Head I and II	\$14.95	ACCESS	Smash the Mad Leader's fortress
Beach Landing	\$29.95	WEEKLY READER	Strategy arcade game based on D-Day
Bismarck	\$29.95	DATASOFT (EA)	Sink the impregnable German warship
Bop 'N Wrestle	\$29.95	MINDSCAPE	Pro Wrestling at its flashiest
BoulderDash Construction Kit	\$19.95	EPYX	Create new screens for the classic game
Bridge 5.0	\$29.95	ARTWORX	Learn to play bridge
Bruce Lee	\$9.95	DATASOFT (EA)	Classic hand-to-hand combat simulator

Classy Chassy	\$9.95	CLEARSTAR	Hot pinball game simulation
Clear for Action	\$30	AVALON HILL	Design your own sea battles
Combat Chess	\$25	AVALON HILL	Chess with a twist
Compubridge	\$19.95	ARTWORX	Learn the ins and outs of bridge
Computer Ambush	\$59.95	SSI (EA)	Man-to-man Squad combat in WWII Europe
Computer Quarterback	\$14.95	SSI (EA)	Football simulation challenges
Conan	\$9.95	DATASOFT (EA)	Hack and slash with the famed barbarian brute
Cross Town Crazy 8	\$19.95	XLENT	Play Crazy Eights cardgame via modem
Crosscheck	\$9.95	DATASOFT (EA)	A different kind of computer crossword
Crossword Magic	\$29.95	MINDSCAPE	You don't need a newspaper for this one
Cycle Knight	\$19.95	ARTWORX	Medieval biker arcade game
Eternal Dagger	\$39.95	SSI (EA)	Fantasy quest role-playing
F-15 Strike Eagle	\$29.95	MICROPROSE	Hot jet aircraft combat simulator
Fat City	\$29.95	WEEKLY READER	You're a construction worker on the lookout for rats
Field of Fire	\$19.95	SSI (EA)	Historic infantry battles of WWII
Flight Simulator II	\$49.95	SUBLOGIC	You can really learn how to fly with your 8-bit
Gauntlet	\$34.95	MINDSCAPE	Barbarian A-Team fights monsters galore
Gauntlet: Deeper Dungeons	\$29.95	MINDSCAPE	More of the above, with even tougher opponents
Gemstone Warrior	\$14.95	SSI (EA)	Fantasy quest in the netherworld
Gettysburg	\$59.95	SSI (EA)	Civil War turning-point battle re-created
Guderian	\$30	AVALON HILL	Do battle with the famous Nazi general
Gulf Strike	\$30	AVALON HILL	Land, air and sea combat in the Persian Gulf
Hunt for Red October	\$39.95	DATASOFT (EA)	Based on the best-selling submarine novel
Infiltrator	\$29.95	MINDSCAPE	Pilot a powerful plane against evil dictators
Kampfgruppe	\$59.95	SSI (EA)	Strategy wargame on the Russian Front
Karateka	\$14.95	BRODERBUND	Fast-moving karate arcade game
Knights of the Desert	\$19.95	SSI (EA)	Rommel's army vs. Britain
Leader Board	\$29.95	ACCESS	Play golf with color and style
Lode Runner	\$14.95	BRODERBUND	The granddaddy of all chase games
Lords of Conquest	\$14.95	ELECTRONIC ARTS	Take over the world in the computer equivalent of Risk!
Maxwell Manor	\$25	AVALON HILL	Haunted house mystery arcade game
Mech Brigade	\$59.95	SSI (EA)	What happens if NATO takes on the Soviet bloc in the 1990s
Mercenary: Escape from Targ	\$9.95	DATASOFT (EA)	3-D graphics as you work your way off a strange planet
Mercenary: Second City	\$4.95	DATASOFT (EA)	Supplementary disk with more Mercenary challenges
Micro League Baseball	\$39.95	MICRO LEAGUE	Statistically based simulation with 25 terrific teams
Mindshadow *	\$17.95	INFOCOM	Classic text adventure game
Miniature Golf Plus	\$19.95	XLENT	Build your own courses, add your own hazards
Mission on Thunderhead	\$25	AVALON HILL	Intergalactic scavenger hunt

Moonmist *	\$17.95	INFOCOM	Text adventure game in a haunted castle
Neverending Story	\$9.95	DATASOFT (EA)	Graphic fantasy realm of the bestselling book and movie
Panzer Grenadier	\$19.95	SSI (EA)	Hitler's elite tanks on the Eastern Front
Party Quiz	\$29.95	SUNCOM	Best of the trivia quiz games for 8-bit
Phantasie	\$39.95	SSI (EA)	Role-playing adventure classic
Phantasie II	\$39.95	SSI (EA)	Back to the lair of the Dark Lords in this sequel
Pinball Construction Set	\$14.95	ELECTRONIC ARTS	Build your own pinball machine
Racing Destruction Set	\$14.95	ELECTRONIC ARTS	Build your own speedways and crash your own cars
Rebel Charge	\$49.95	SSI (EA)	Civil War action at Chickamauga
Run For It	\$29.95	WEEKLY READER	Help Orbit the Robot flee from the bad guys
Seastalker *	\$17.95	INFOCOM	Text adventure game with underwater treasure hunt
Seven Cities of Gold	\$14.95	ELECTRONIC ARTS	Conquer Latin America for the Spaniards
Shiloh	\$39.95	SSI (EA)	Re-fight General Grant's debut

Zorro	\$9.95	DATASOFT (EA)	Acrobatic sword-fighter in hot graphics screens

Sources for 8-Bit Atari Products

Over 65 manufacturers and publishers

Following are the addresses and phone numbers of the manufacturers (in alphabetical order) of the over 275 available 8-bit Atari products listed in **Antic's** Seventh Annual Shoppers Guide. Generally these manufacturers are willing to ship you any of their products which you cannot conveniently obtain from a local retailer, or from a mail-order supplier who advertises in **Antic**.

Often, shipping charges or sales tax must be added to the cost of your order. So it is best to check with a manufacturer for the latest total price—either by phone or by mail—before you send any payment (by check, money order, or credit card number). Companies providing toll-free 800 phone numbers tend to prefer that these toll-free lines be used for credit card purchases, not simply for questions about the products.

SUPPORT ATARI PRO

ATARI 400/800/600/ 1200

SERIOUS BUSINESS

Can you really run a business on your Atari? You bet! TurboBase from MicroMiser is serious software for serious businesses. It computerizes your whole office with General Ledger, Accounts Receivable, Accounts Payable, Payroll, Inventory, Point of Sales, etc. It's also **a REAL database with REAL power** to organize your information. After giving up on other databases, many happy customers use TurboBase for its database power alone.

TurboBase is equal to anything running on IBM PCs, but costs thousands less. Hundreds of **successful business are running on TurboBase**. This is a comprehensive package; it's flexible and sophisticated. Expect to spend about six weeks learning to get the most out of it. Of course MicroMiser provides complete professional support.

Now TurboBase 80 demolishes the final advantage of more expensive machines. It works with the Atari XEP 80 adaptor to give your work **a full 80 column display**. See twice as much information at a glance. Lay out your reports and forms exactly as they'll appear in print. If you don't already have the Atari XEP 80 adaptor, we'll provide that for you, too.

TurboBase (TH0015)..... \$159.95
TurboBase 80 (requires XEP 80) (TH0016) \$179.95
Atari XEP 80, 80 column adaptor (TH0017). \$79.95

EVERYONE'S FAVORITE

SUPERDOS 5.0 supports all drives and densities with auto-sensing so you'll never again worry about mixed formats. Plus, you get support for RAMdisks (up to 320K), and you can restore deleted files and patch damaged ones and much more. Only SUPERDOS 5.0 **fully supports your new XF551 disk drive**, yet is compatible with DOS 2.5. SUPERDOS is the easiest, friendliest DOS there is. See why everyone loves SUPERDOS. Imported from Australia by Technical Support.

SUPERDOS 5.0 (TH0023)..... \$20.00

STICKYBEAR SAYS HI!

ROCKFORD: THE ARCADE GAME

Just what we needed: another sequel to Boulder Dash. But **Rockford: The Arcade Game** promises a whole new experience—*based* on Boulder Dash, not just another version of it. That's too bad, because another version of Boulder Dash might have offered more.

Your goal is to move through various mazes and levels (a total of 80 combinations), collecting items and avoiding dangers. In the original, you collected diamonds while avoiding falling rocks and exploding butterflies. But Rockford puts you in settings such as outer space or the Old West. So the treasures and monsters are as diverse as your environments. You'll pursue Indian pennies and suns while avoiding tumbleweeds and comets. Unfortunately, all this diversity is overshadowed by the familiar theme of the program.

I think the problem is that when the video veneer is stripped away, at the core is only your standard collection game again. Pac-Man and hundreds of others can call themselves Rockford's ancestors, in one way or another. I just wasn't taken with this game. But those who are—and there will be Rockford fanatics—will revel in the fast action and brilliant animation. Arcade-quality animated sequences appear at key points throughout play which, with 80 screens, is certain to last awhile. As usual with

arcade games, the manual and instructions are sparse. Completing the game depends mostly on trial and error, with patience and fast reflexes helping immeasurably.

While the ST's speed and image are just about as expected (fast and distinct), the IBM's CGA graphics are also surprisingly sharp. Rockford selects the required graphics mode for you (anything but monochrome will do). This makes loading a snap. And the PC version handles quite

nicely despite its keyboard control. We might as well face it—the IBM PC compatible is a business machine. I know of few users who have a game port, much less a joystick.

Rockford treads ground that the originals covered long ago. So why not just reproduce the originals? Like fine art and good music, the classic video games improve with age. I'd love to have a true arcade-quality Asteroids, or maybe Galaga

or Xevious. Or even Pac Man. Certainly the ST and PC can handle these. But although I cannot recommend Rockford sight unseen, some arcade aficionados might find it worthwhile. And there will be a few people who won't be able to put it down. ▲

\$29.99, color. Arcadia (Electronic Arts), 1820 Gateway Drive, San Mateo, CA 94404. (415) 571-7991.

SIERRA

Police Quest is Sierra's trek into the brutal world of vice, drugs and homicide. An adult perspective on the life of a police officer, Police Quest deals not only with "Dirty Harry" aspects of the profession, but also with its daily routines.

Police Quest is the most authentic graphic adventure game available for personal computers. Players are required to follow police procedures during the course of the action, just as officers must follow them in the real world. A manual explaining police procedures for arrests and other situations is included with the package. Police Quest is a dramatic tale straight from today's headlines!

ALL AT SEA

Tower Toppler takes you to the planet Nebulus, where evil forces have built seabed-based towers. As senior operative for Destructo, Inc. you race your MK-7 minisub to the towers, which you must scale while avoiding mutant molecules, falling boulders, attack robots, slime, disintegrating ledges, and apparently impenetrable barriers. The towers' 3-D rotation adds an extra dimension to this action-packed maze race.

\$49.95, color. Epyx, 600 Galveston Drive, Redwood City, CA 94063. (415) 368-3200.

CHRONO-QUEST

Chrono-Quest (\$49.95) is the first adventure game from Psygnosis, and takes up a whole four disks with its fiendish plot twists. A hit in France under the name "Explora," the game sends you from 1920 into the future and around the world, in a quest to find your father's Time Machine and clear yourself of his murder.

\$49.95, color. Computer Software Service (Psygnosis), 2150 Executive Drive, Addison, IL 60101. (800) 422-4912; in Illinois (800) 331-SOFT.

WARLOCK

You and several endearing, Tolkienesque characters search for the stolen Karna in **Warlock**, a full-color, animated action-adventure game featuring 20 increasingly difficult levels and digitized sounds. This new game from the people who brought you *Dark Castle* is geared toward the beginner, although it's still challenging for more experienced players.

\$34.95, color. Three-Sixty Pacific, Inc., 2105 South Bascom Avenue, Suite 290, Campbell, CA 95008. (408) 879-9144.

BIONIC COMMANDO, STREET FIGHTER

CAPCOM U.S.A., Inc., a leading manufacturer of arcade and home video entertainment, enters the ST market with two translations of their successful arcade games. In **Bionic Commando** (\$29.95), you are an android soldier of the future, struggling against the relentless onslaught of invading forces, trying to fight your way into their fortress headquarters.

Going from science fiction to martial arts adventure, CAPCOM's other game is

Street Fighter (\$39.95). Gentlemanly conduct won't get you any points in this no-holds-barred contest. Karate sluggers Ryu and Ken travel the world, punching, kicking and screaming through Japan, England, China, Thailand and the U.S.

\$39.95, color and joystick. CAPCOM U.S.A., 1283-C Mountain View/Alviso Road, Sunnyvale, CA 94089. (408) 745-7081.

BETTER DEAD THAN ALIEN

Prepare to do battle as you and galactic hero Brad Zoom face the most revolting life forms ever to pollute the universe in **Better Dead Than Alien**, a spiffed-up Space Invaders clone with sharp graphics, plenty of sound effects and a bit of hu-

mor. As the waves of colorful aliens attack in this multi-level shoot-'em-up, you can wipe them out by yourself or in competition with a friend in simultaneous dual player mode.

\$34.95, color. Discovery Software (Oxford Digital), 163 Conduit Street, Annapolis, MD 21401. (800) 342-6442.

SKYCHASE, OPERATION: CLEAN STREETS SPACE RACER

SkyChase (\$39.95), designed by Maxis, is a fast-paced jet combat game and flight simulator that promises accurate jet-flight physics and fast, smooth action—with seven different jets to choose from. In the two-player option you can engage in head-to-head combat with a friend or solo against the computer.

As Cleanup Harry, an undercover cop, you'll track down criminals in **Operation: Clean Streets** (\$39.95). Using hand-to-hand combat skills, you must defeat your opponents and confiscate their drugs—all throughout the worst part of town.

You are Earth's sole representative in an intergalactic contest in **Space Racer**. 3-D animation and graphics add to the fun as you dodge other racers or blast them out of the sky, speeding over three alien worlds in a desperate attempt to stay alive.

Color and joystick. Broderbund Software, 17 Paul Drive, San Rafael, CA 94903. (415) 492-3200.

ATARI PHONE (716) 467-9326

JUST RELEASED!

\$99.95

"SUPER ARCHIVER II!"

(for ATARI 1050 drives)

NOW! COPS all ENHANCED DENSITY programs plus retains all of the features of our World Famous SUPER ARCHIVER! (see below). Allows you to COPY or CREATE single or ENHANCED density protection schemes (including PHANTOM SECTORS!). Completely automatic; compatible with the BIT-WRITER!; the ULTIMATE BACKUP/PROGRAMMING device! Only \$99.95 plus \$4 S/H/I! NOTICE! If you already own a SUPER ARCHIVER, you can upgrade to a SUPER ARCHIVER II for only \$29.95 plus \$4 S/H/I! (disk only - no additional hardware required).

THE

\$69.95

"SUPER ARCHIVER"!

(for ATARI 1050 drives)

\$69.95

The new SUPER ARCHIVER, obsoletes all copying devices currently available for the ATARI 1050! It eliminates the need for Patches, PDB files, Computer Hardware, etc. Copies are exact duplicates of originals and will run on any drive; without exaggeration, the SUPER ARCHIVER is the most powerful PROGRAMMING/COPYING device available for the 1050! Installation consists of a plug-in chip and 6 simple solder connections. Softwares included. Features are:

- TRUE DOUBLE DENSITY
- ULTRA-SPEED read/write
- FULLY AUTOMATIC COPYING
- SUPPORTS EXTRA MEMORY
- SCREEN DUMP to printer
- TOGGLE HEX/DEC DISPLAY
- SECTOR or TRACK TRACING
- AUTOMATIC DIAGNOSTICS
- DISPLAYS HIDDEN PROTECTION
- ADJUSTABLE/CUSTOM SKEWING
- AUTOMATIC SPEED COMPENSATION
- AUTOMATIC/PROGRAMMABLE PHANTOM SECTOR MAKER
- ARCHIVER/HAPPY ARCHIVER COMPATIBLE
- BUILT-IN EDITOR - reads, writes, displays up to 35 sectors/track short
- BUILT-IN CUSTOM FORMATTER up to 40 sectors/track
- BUILT-IN DISASSEMBLER
- BUILT-IN MAPPER - up to 42 sectors/track
- DISPLAYS/COPIES Double Density HEADERS
- AUTOMATIC FORMAT LENGTH CORRECTION
- SIMPLE INSTALLATION

The SUPER ARCHIVER is so POWERFUL that only programs we know that can't be copied are the newer ELECTRONIC ARTS and SYNFILE/SYNCALC (34 FULL sectors/track). If you want it ALL... buy the "BIT-WRITER"! also... then you'll be able to copy even these programs! Only \$69.95 plus \$4 S/H/I.

\$79.95

"BIT-WRITER"!

\$79.95

The Super Archiver "BIT-WRITER" is capable of duplicating even the "uncopyable" EA and SYN series which employ 34 FULL sectors/tracks. "BIT-WRITER" is capable of reproducing these and FUTURE protection schemes of non physically damaged disks. PLUG-IN circuit boards and 4 simple solder connections. The "SUPER ARCHIVER with "BIT-WRITER" is the ultimate PROGRAMMING/COPYING device for Atari 1050's. EXACT DUPLICATES of originals are made! Copies run on ANY drive. Must be used with Super Archiver. Only \$79.95 plus \$4 S/H/I.

\$69.95

"ULTRA SPEED PLUS"

\$69.95

Imagine a universal XL/XE Operating System so easy to use that anyone can operate it instantly, yet so versatile and powerful that every Hacker, Programmer and Ramdisk owner will wonder how they ever got along without it! Ultra Speed Plus puts unbelievable speed and convenience at your fingertips. Use ANY DOS to place an ULTRA SPEED format on your disks, boot any drive (1-9) upon power-up, format your RAMDISK in Double Density, activate a built-in 400/800 OS for software compatibility, plus dozens of other features too numerous to mention! Below are just a FEW features you'll find in the amazing OS:

- ULTRA Speed SIO for most modified drives
- ULTRA Speed is toggleable
- Boot directly from RAMDISK
- Special timer circuits not required for 1 or 2 Meg upgrades
- Background colors adjustable
- Reverse use of OPTION key
- Cold-start without memory loss
- Built-in floppydisk configuration editor (1-9)
- Built in RAMDISK configuration editor (1-9)
- RAMDISK exactly duplicates floppy drive so sector copying and sector editing are now possible
- Built in MINI Sector Copier
- Toggle SCREEN OFF for up to 40% increase of processing speed.
- Toggle internal BASIC
- Ram resident disk loader program (MACH 10 menu)
- DOUBLE DENSITY RAMDISK capable
- Entire MEMORY test that pinpoints defective RAM chip
- Boot any drive (1-9) upon power-up or cold-start
- Supports memory upgrades up to TWO MEGABYTES
- THREE Operating Systems in one (XL/XE, 400/800, ULTRA SPEED PLUS)

\$29.95

"XF551 ENHANCER!"

\$29.95

The XF551 Atari drive is a fine product with one major flaw...it writes to side TWO of your flopping disks BACKWARDS. This causes read/write incompatibility problems with all other single sided drives made for Atari such as Indus. Trak, Rana, Percom, Astra, Atari 1050, Atari 810, etc. Add the XF551 ENHANCER to the new XF551 drive and your problems are over! This device will restore 100% compatibility while retaining original design qualities of Atari's super new drive. The XF551 ENHANCER is a MUST for all XF551 Owners. Installation is simple. Only \$29.95 plus \$4 S/H/I.

DEALER/DISTRIBUTOR/USER GROUP Discount available call for info.

COMPUTER SOFTWARE SERVICES
P.O. Box 17660
Rochester, N.Y. 14617

\$69.95

THE BATTERY BACKUP!

\$69.95

The BATTERY BACKUP! is a device which easily connects to your computer (800XL or 130XE) to prevent loss of operation or memory in the event of "brown-outs" or power failure! Complete with its own heavy duty battery and battery charger, the BATTERY BACKUP! will instantly take over the task of supplying power to your computer should a "low power" or "no power" situation develop. This product is of particular interest to BBS operators and Ramdisk/MIO users! Only \$69.95 plus \$8 S/H/I.

\$39.95

THE "QUINTOPUS!"

\$39.95

The "QUINTOPUS!" is an inexpensive device that provides a tremendous amount of convenience while eliminating the problems associated with the endless "daisy-chaining" of peripherals (eg: drives, interfaces, printers, modems, cassettes, etc.). The "QUINTOPUS!" is an I/O port expander that converts a single I/O output/input into five additional outputs/inputs. Instead of daisy-chaining all of your peripherals (which often times results in passing a signal through 30 feet or more of cable), the "QUINTOPUS!" allows each device to be connected directly to the computers through only three or four feet of cable. This is particularly useful when attempting to use ULTRASPEED or WARPSPEED data transfer rates. The "QUINTOPUS!" also provides the "extra" I/O ports often needed to connect devices not having daisy-chaining capabilities. Cable resistance and capacitance are greatly reduced thereby significantly improving the opportunity of accurate data transfers! Only \$39.95 plus \$4 S/H/I.

\$59.95

THE "QUINTOPUS!" (with SWITCHABLE PORTS!)

\$59.95

This Deluxe version of the "QUINTOPUS!" has all of the above features with the additional benefits of two SWITCHABLE PORTS! This means you can connect two computers to one printer or two printers to one computer; you can switch in a computer/printer combination and while you're printing out a long document, switch in a second computer to access a modem, disk drive, cassette deck, etc! Switch multiple combinations of peripherals or computers without the hassle or re-arranging I/O cables... simply flip a switch! Only \$59.95 plus \$4 S/H/I.

\$29.95

RAMDISK "WRITE-PROTECTOR!"

\$29.95

Hackers, Programmers, or BBS users...if you own a RAMDISK (memory upgrades for your XL or XE computer), think about this: Every disk drive ever manufactured has WRITE-PROTECT capabilities...except your RAMDISK. Without it, your valuable stored data/program lie naked, awaiting that one mistake that will wipe out hours, maybe weeks of precious programming efforts. End the fears of accidental formatting or overwriting by installing our universal RAMDISK "Write-Proector!" Works on all memory upgrades up to 2 megabytes. Simple installation. Only \$29.95.

LIMITED SPECIALS!

Previously we listed these products under our FIRESALE ad but many of our customers feared that the software items might be smoke or water damaged. They're NOT! All of the items listed below are BRAND NEW...only their literature or packing may have slight cosmetic imperfections. All items are fully warranted! Quantities are limited! No rainchecks!

ST Flight Challenges

By Wolf Griffey

JET

From SubLOGIC, makers of Flight Simulator II, **Jet** is a good start for a potentially great combat aircraft simulator. It has a well thought-out format and seems to provide a powerful internal platform on which improvements could be made. For the new simulator pilot, **Jet** is a very, very good starter.

Yet, for hardened pilots or old jocks there is still much to be desired. I have put in a few hours in the *real-life* ancestors of the F-16 Falcon and F/A Hornet. And considering the marvelous performance of these airplanes and their weapons systems, **Jet** seems to fall short.

As an experienced simulator flier, I found that **Jet's** graphics gave me a feeling of slow motion in a high speed environment. The control response was below the level I expected, which made for a most agonizing period of combat. The handling was so jerky that I went back to free flight to try putting my finger on the problem. The graphics need more solidity too. These jet aircraft can look like the most graceful of angels in a tight turn and climb.

To test my suspicion that the background updating was not smooth enough, I did a beautifully executed eight-point roll with only one movement of the stick. (The Blue Angels should be so good.) Instead of the nice smooth roll I expected, I was presented with eight frames of the plane freezing and reappearing in stages of a roll. A much faster update is needed to keep hot sticks from always overshooting their targets and

getting lost. You learn to anticipate this problem, but smoother response would be nice and make things much more realistic.

Another problem is the cockpit layout. **Jet** uses a generic cockpit for two very different aircraft. The F-16 has one engine, the F/A 18 has two. Yet **Jet** shows only one thrust gauge for both. The instrument displays in this program are good enough for a general air-combat game. But this is a simulation, so it should be true to the planes it simulates. I was hoping for a Heading Situation Indicator, a centerpiece in a modern fighter. It also would have been slick to show the triple CRT screens of the top of the line F/A-18. And I like landing with Indicated Air Speed readouts—not a percentage of the speed of sound, as **Jet** requires.

The cockpit instruments need to be updated so you feel like there is a high performance aircraft wrapped around you. Fuel, weapons, gear position and altimeter readouts should be organized so the pilot can find them in a normal scan, without having to look up, down and all over the screen.

Jet already contains so many features that I believe it should be moved to a two-disk set, to make possible a higher level of play. Add some basic aerobatics to the free flight section, put in a scoring system for correct handling and you will have more than a game—a truly advanced flight simulation package.

Overall, the manual is well written. The documentation provides background and access instructions on the displays, instruments, controls and weapons available to the **Jet**. There is a great deal of material, but it is all bro-

ken down into easy, readable and logical chapters. A novice fresh from watching the demo can climb into the seat and sample free flight with little or no trouble. Taking a few minutes to do a self-test by flying the written course adds to the pilot's knowledge of two ships' basic handling traits.

Jet is a good program for the first-time computer pilot. Using it as a starter kit to learn control and feel is the way to go. **Jet** is not what my hardcore gaming friends and I look for in real-time simulation play. But if **Jet** became smoother, faster and more colorful, it could be the benchmark against which others must be judged.

\$49.95, color. SubLOGIC Corp., 713 Edgebrook Drive, Champaign IL, 61820. (217) 359-8482.

DIVE BOMBER

It's May 24, 1941. The powerful German battleship *Bismarck* has sunk the British cruiser *HMS Hood* and is now free to roam the North Atlantic and sever vital Allied supply lines. To stop the *Bismarck*, the Allies secretly arrange to borrow a prototype of the new top-secret U.S. Navy torpedo bomber—the Grumman Avenger.

Dive Bomber is a historical war-game with a fantasy twist—because even though the Avenger won fame as a great Navy Aircraft, it first saw action at Midway in 1942, the year after the *Bismarck* hunt.

As the Avenger's crew—pilot, engineer/navigator and rear gunner—you become the main protection of the aircraft carrier leading the hunt. On each display screen, a selection box

calls your attention to whichever screen where immediate action is required. With artillery rounds and torpedoes, you must protect the HMS Ark Royal from the Luftwaffe's Dornier aircraft, U-Boats, E-Boats, and floating mines. Above all else, you must sink the Bismarck—without the Ark Royal meeting its end.

At the start of Dive Bomber, I strongly advise that you take the option of running practice missions—carrier take-offs and landings, flying, and best of all, as many torpedo runs on the Bismarck as you want to make.

The cockpit area of the Avenger is very well laid out and close to the real thing, at least for the controls needed for this type of play. The stick is responsive, and control is easy to maintain. The engineer's screen repeats this level of detail with the control layout for ignition, throttle, fuel gauges and other controls requiring your attention.

As rear gunner you fire at targets passing behind the Avenger. Navigation is a more complex position. While the navigation screen shows

the current position of Avenger and enemy forces, U-boats do not show until they surface. Watch out—if the Bismarck moves off the map before you can get to it it's then out of play for that game.

The Avenger can be controlled by either joystick or mouse. Movement is quick and sure with either. Graphics

are also very good. Since the action always takes place at night over water, all the player has to watch is a black background on which the enemy will appear. The targets enlarge as they approach, giving a real feel of speed as you close in.

Score is kept on targets hit and damage to the Ark Royal and Avenger. Plus, of course, whether the Bismarck was sunk or escaped from the play area. You begin by choosing straws for a mission. (Getting the short straw is like having the entire German Air Force, surface and subsurface Navy forces totally surrounding the Ark Royal.) Each mission has a different pace and placement of enemy ships, aircraft and mines. No two missions, however many times run, will be the same. **A**

Warlock

Space Cutter

Virus

Strip Poker II

VIRUS

Virus claims to be the most infectious game ever. Maybe not, but it can certainly bring on quick symptoms of gaming fever. And the cure comes only after long periods of play.

Why the fever? Simply, the graphics are among the very best I have seen on the ST, definitely of arcade quality. The colors and detail make a solidly believable 3-D background, but playing speed is not sacrificed for scenery. The pace is more than fast enough for the most hardened game players to enjoy.

Virus begins as alien seeder ships appear and quickly pass over the countryside, spreading a slimy red virus which poisons everything it touches. As a Hoverplane pilot, you race to intercept these menacing alien ships before more spores can be

released. Your marvelously handling craft blasts seeders from the sky with powerful laser cannons and heat-seeking missiles. Other aliens attack—drones, mutated drones, bombers, pests and fighters.

The playing area view is a breeze to interpret, so you can spend your time hunting aliens instead of reading dials. The land map shows just how little of the potential play area is actually in view of the Hoverplane. This vast area of operation does wonders for the graphic effect of the total game. The trees, houses, fields and water look as solid as in the real world. Run into any of them and it's time to go get a new Virus destroyer. The contouring of the landscape adds a realistic thrill as it appears and passes when you make a low attack.

You control the Hoverplane by mouse or keyboard. I started out with

the mouse and discovered that, just as it warns in the manual, the Hoverplane may lag behind the mouse movement. Three quick and spectacular crashes later I was on keyboard control. I firmly believe that the mouse is the first thing that the aliens infect. However, you can reconfigure the keyboard before the start of Virus action. And I did just that, designing a layout that felt natural to me.

—WOLF GRIFFEY

\$29.95, color. Rainbird, P.O. Box 2227, Menlo Park, CA 94026. (800) 227-6900.

FINAL ASSAULT

Ever watch in amazement those TV documentaries about the latest expedition to scale some big, treacherous mountain somewhere? It always seemed too dangerous and cold for my tastes. But I might be interested, if someone could devise a way for me to do it without the danger or the sub-zero temperatures.

Epyx has come to answer that challenge with **Final Assault**. Graphically, the game is beautiful, looking much like the company's Summer, Winter and World Games efforts. The gameplay is much the same too, requiring a certain amount of dexterity and a good memory to succeed in scaling even the smallest peaks.

What's really exciting about this release is that it goes in a direction more software publishers should attempt. Plenty of companies are reproducing or cloning hits from the arcades. Plenty of companies are doing adventure games in both past and future scenarios. Plenty of companies are doing war and sports simulations. But there are very few companies interested in pioneering exciting simulations outside the software main-

stream.

I doubt that Epyx got many user response cards wanting a mountain-climbing game. But I believe most players will get a certain excitement from playing *Final Assault* and a certain sense of accomplishment when they get to the top of the biggest mountain.

There are six trails choose to from, along with a training hill for getting used to the game's mechanics. You can take on the paths solo, in pairs or threesomes. The names of the six tests give a good idea of what's ahead. There's *Hat Trick*, *Side-Burner*, *Edge Of Fright*, *Footloose*, *Knucklehead* and *Consider Me Gone*.

The first step is to pack a rucksack. Although one is already packed for you, it is possible to change those selections. First-timers would probably do just as well to stay with the suggested items. Whether rock-climbing or climbing on ice, it is necessary to have the right equipment on your feet and hands before you even attempt to get going.

Unless you do some mountaineering and know the difference between crampons and pitons, a four-page directory of climbing terms at the back of a 25-page rule book will be useful. The training trail is both helpful and a nuisance. When playing at that level, hints of things you might want to do or things you might want to do differently appear regularly. It is necessary to press the [ESC] key to remove the message and continue with the game.

After that, it's a matter of figuring out the proper sequences of joystick moves and button pushes to get the climber up the side of the mountain. Most of your time will be spent climbing, although there are segments of flat travel between climbs when you'll need to walk, test ground and sometimes jump over small crevasses.

On the longer journeys, it will be necessary to have along enough provisions to keep food in your belly and liquids in your system. Unless you like

your food raw, it would be a good idea to keep a small stove in that backpack. Using the joystick to move an on-screen cursor around, you can switch from carrying or wearing certain items, to putting them in the backpack and visa versa. If you're on a climb though, don't forget to strap yourself to the mountain first.

Don't be fooled by how easy it is to get to the top of the training slope or the easiest of the trails. It's much harder and the program gets much less forgiving for minor mistakes as you advance. *Final Assault* may not be the program that fills the void in everyone's gaming collection. But it is a worthwhile addition for anyone who ever looked up at those magnificent peaks and daydreamed about climbing them.—RICK TEVERBAUGH

\$49.95, color. Epyx, 600 Galveston Drive, Redwood City, CA 94063. (415) 366-0606.

STRIP POKER II

Strip Poker, one of the most tasteless ST games available (at least commercially, through a major publisher), has gotten better. Or do I mean worse? I guess that depends on your point of view.

Strip Poker is one program that won't surprise you when you run it. The name is self-explanatory and everyone knows what strip poker is. What you probably don't know is that your opponents in this latest version of the game are digitized images. Which means that these women (and men, on one of the data disks) are no longer merely electronic paintings. No, these images are now more like grainy photographs.

Other than some sound effects and a different card style, the game plays just as it always has. Owners of the original may wish to check with Artworx concerning the availability of digitized data disks for their current version, and new purchasers should make sure that they're getting the new

version.—STEVE PANAK

\$39.95, color. Artworx, 1844 Penfield Road, Penfield, NY 14526. (716) 385-6120.

SPACE CUTTER

Space Cutter takes place in the largest arena I have ever seen on a computer screen. And the ultimate score is the highest anyone can obtain, infinity. The galaxy is occupied by a race of intelligent spaceships which have enslaved most of the human population. To gain freedom you must reach the Five Perfect Solids. You are a lone human, flying your Meson Fighter through the enemy-occupied galaxy by way of the Whirligig, a network of over four billion mini-universes linked by Stargates. To get to the Fifth Solid alone requires a route of 32 gates.

Your Meson Fighter is capable of high speeds and extremely fast turns. For protection it is outfitted with target-seeking missiles and chaff pods. The missiles have a quick response, streaking toward the target along the shortest route possible. Unfortunately this route might intersect with the fast-maneuvering Meson itself. Chaff, on the other hand, will not destroy the Meson, but will go for the highest priority target. Enemy ships come in many types and their aggressiveness increases as the Meson travels deeper into Whirligig.

Control is by mouse only. Chaff and missiles are fired by button selection. A control panel for the navigation and status of the Meson can be brought up for viewing at any time during a sector run. It provides a mapping of the stargates and supply depots.

Overall, *Space Cutter* is fairly fast paced and active. The graphics have a good, solid feel, with lively colors and background. Good scrolling speed makes going at high rates more than just interesting, adding a touch of carefree danger and spice. The graphics for sector entry and exit are

fun to watch. —WOLF GRIFFEY

\$29.95, color. Rainbird, P.O. Box 2227, Menlo Park, CA 94026. (800) 227-6900.

FIRE AND FORGET

Fire and Forget is a road racing game along the lines of Titus' earlier *Crazy Cars*. But where *Crazy Cars* had a poor control system and rather uninteresting play mechanics, *Fire and Forget* is easy to control, and has some good sound effects and graphics. It's also fun to play, if somewhat repetitious.

Fire and Forget is set far in the future. The Earth is in the grip of international terrorists who have started wars in seven areas of the globe. You must stomp out these brush fires that threaten to explode into nuclear conflagration.

You'll be driving the *Thunder Master*, a sort of supercar with a powerful missile launcher mounted on top. (Wish I had one of these in rush hour traffic!) In a one-player game, only the *Thunder Master* is available. But in a two-player game, the other player controls the *Thunder Cloud*, a jet plane that deals with your airborne enemies. Both players can use joystick or keyboard control. There are three levels of difficulty, with level 1 being good for anyone lacking super reflexes. The high score is automatically saved to disk, which is a nice touch.

The map of the world shows the seven trouble spots. You can deal with them in any order. Simply use the joystick to select the one you want and press the trigger. The screen clears and things start getting exciting.

Your viewpoint is from behind and slightly above the car. Speed and steering are controlled with the joystick. To fire, press the trigger. You can't have more than about four missiles in the air at once, so don't go around firing indiscriminately. You earn points for obliterating enemies with your missiles. Airborne choppers, roadside

pillboxes, barbed wire and other obstacles help develop your steering ability and the quickness of your trigger finger. Destroyed enemies disappear in a satisfying explosion, complete with realistic sound. Sometimes the road will split and you must then choose which fork to drive on, though both will eventually lead to the end.

The key ingredient to surviving *Fire and Forget* is fuel. The line across the top of the screen shows how much of this precious resource you have left. You'll use it up quickly as you travel, though not at a rate proportional to your speed. You can refuel at green or blue fuel depots positioned along the road, and you pay a huge fuel penalty whenever your vehicle explodes from a hit. If you run out of fuel, the game is over. One word of warning: Don't use the blue cisterns to fill up the jet plane, because it will explode—it can only fill up from the green cisterns.

Fire and Forget's graphics are slightly better than those of *Crazy Cars*. However, the explosions are very realistic—the sound was probably digitized. Overall, I like this game. It's fast and furious, and even novices can survive long enough to have a good time.—DAVID PLOTKIN

\$39.95, color. Titus Software, 20432 Corisco Street, Chatsworth, CA 91311. (818) 709-3692.

WARLOCK

Warlock is playable, fun and has good graphics, animation and some real challenges. You'll guide a warlock in his quest for the stolen Karna, a jewel of the underworld. You must also recapture eight magical objects scattered throughout the game's 20 screens.

In this joystick-operated game, the warlock can move, jump, and go up and down levels when appropriate. He is armed with a scepter that fires energy bolts at the different enemies

featured on each level. Some enemies move blindly and are easily avoided; others bounce around and are hard to hit; still others can freeze your wizard in place, which can be very dangerous; and then there are those who shoot back.

Your enemies all are highly detailed and well-animated: the zombies lurch, the bats flap their wings, the ghosts flit back and forth. There are some indescribable enemies as well, and discovering how to defeat newly encountered creatures is part of the fun. Shooting enemies can be profitable too, as some leave gifts that you may find extremely useful in the upper levels.

The sound in *Warlock* is noteworthy. Aside from explosions and such, flashes of lightning are followed by the crash of thunder, and the echoes of digitized night sounds are uncanny.

The scoreboard at the top of the screen keeps track of the number of items you have recovered, your score, the power of your scepter and your vitality. Without power you can't shoot at your enemies, and the game is over when vitality drops to zero. As you explore, you'll find items that restore your power and vitality, as well as jewels that partially protect you from the assaults of the denizens of the underworld.

Overall, I like *Warlock* a lot and have managed to play 12 levels. You need to keep an eye on your vitality, because some areas which look harmless are actually very draining. One problem is that there can only be two fireballs (such as those fired from your scepter) on the screen at any time. Thus, if an enemy is firing at you, you can't shoot back. This should be fixed, as you might be unable to shoot at the most embarrassing times. Aside from this, though, I recommend *Warlock* as an entertaining shoot-em-up.—DAVID PLOTKIN **A**

Lyco Computer Marketing & Consultants

Air orders processed within 24 hours.

Lyco Means Total Service.

Mark "Mac" Bowser, Sales Manager

I would personally like to thank all of our past customers for helping to make Lyco Computer one of the largest mail order companies and a leader in the industry. Also, I would like to extend my personal invitation to all computer enthusiasts who have not experienced the services that we provide. Please call our trained sales staff at our toll-free number to inquire about our diverse product line and weekly specials.

First and foremost our philosophy is to keep abreast of the changing market so that we can provide you with not only factory-fresh merchandise but also the newest models offered by the manufacturers at the absolute best possible prices. We offer the widest selection of computer hardware, software and accessories.

Feel free to call Lyco if you want to know more about a particular item. I can't stress enough that our toll-free number is not just for orders. Many companies have a toll-free number for ordering, but if you just want to ask a question about a product, you have to make a toll call. Not at Lyco. Our trained sales staff is knowledgeable about all the products we stock and is happy to answer any questions you may have. We will do our best to make sure that the product you select will fit your application. We also have Saturday hours - one more reason to call us for all your computer needs.

Once you've placed your order with Lyco, we don't forget about you. Our friendly, professional customer service representatives will find answers to your questions about the status of an order, warranties, product availability, or prices.

Lyco Computer stocks a multimillion dollar inventory of factory-fresh merchandise. Chances are we have exactly what you want right in our warehouse. And that means you'll get it fast. In fact, orders are normally shipped within 24 hours. Free shipping on prepaid orders over \$50, and there is no deposit required on C.O.D. orders. Air freight or UPS Blue/Red Label shipping is available, too. And all products carry the full manufacturer's warranties.

I can't see why anyone would shop anywhere else. Selection from our huge inventory, best price, service that can't be beat — we've got it all here at Lyco Computer.

TO ORDER, CALL TOLL-FREE: 1-800-233-8760

New PA Wats: 1-800-233-8760

Outside Continental US Call: 1-717-494-1030

Hours: Monday through Friday, 9:00 a.m. to 9:00 p.m.

Saturday, 10:00 a.m. to 6:00 p.m.

For Customer Service, call 1-717-494-1670,

9AM to 5PM, Mon. - Fri.

Or write: Lyco Computer, Inc.

P.O. Box 5088, Jersey Shore, PA 17740

PLEASE NOTE: • full manufacturers' warranties • no sales tax outside PA • prices show 4% cash discount; add 4% for credit cards • APO, FPO, international; add \$5 plus 3% for priority • 4-week clearance on non-certified checks • we check for credit card theft • sorry, compatibility not guaranteed • return authorization required • due to new product guarantee, return restrictions apply • price/availability subject to change • prepaid orders under \$50 in Continental US, add \$3.00.

Cardiac Arrest!

1988 Antic Award Winner

"Outstanding Product"

IBM, Apple II, Atari XE, Atari ST

Antic: "Impressive and amazingly complete."

ST World: "Remarkably easy to use."

Computer News for Physicians: "Excellent value."

You interpret the patient's history, on-screen EKG, lab data, and vital signs, then give treatment orders in plain English. Varying degrees of difficulty, with over 45 patients — and none is ever the same twice. Go "beyond ACLS" with hypothermia, hypocalcemia, hyperkalemia, and more. So much fun, non-medical people use the simulator to "play doctor."

ACLS Teaching Series*	\$109
Cardiac Arrest!	\$69
ACLS Protocols	\$29
EKG Teaching	\$29
CardioQuiz	\$19
Blood Gases	\$24

*The four-disk ACLS teaching Series includes Cardiac Arrest!, ACLS Protocols, EKG Teaching, and CardioQuiz at 34% savings.

TYPING SPECIAL ATARI CHARACTERS

The Atari Special Characters and the keys you must type in order to get them are shown below:

For [CONTROL] key combination, *hold down* [CONTROL] while pressing the next key. For inverse [CONTROL] [A] through [CONTROL] [Z], press the [] key—or [] on the 400/800—then *release* it before pressing the next key. (Press [] or [] again to turn off inverse.) For [ESC] key combinations, press [ESC] and then *release* it before pressing the next key.

Carefully study the chart above and pay close attention to differences between lookalike characters such as the slash key's [/] and the [CONTROL] [F] symbol [].

TYPO II AUTOMATIC PROOFREADER

TYPO II automatically proofreads Antic's type-in BASIC listings. Type in the listing below and SAVE a copy to disk or cassette. Now type GOTO 32000. At the prompt, type in a single program line **without the two-letter TYPO II code at the beginning**. Then press [RETURN].

Your line will reappear at the bottom of the screen. If the TYPO II code does not match the code in the magazine, then you've mistyped your line.

To call back a previously typed line, type [*], then the line number, then [RETURN]. When the completed line appears, press [RETURN] again. This is how TYPO II proofreads itself.

To LIST your program, press [BREAK] and type LIST. To return to TYPO II, type GOTO 32000. To remove TYPO II from your program, type LIST "D:FILENAME",0,31999, then [RETURN], then NEW, then ENTER "D:FILENAME", then [RETURN]. Now you can SAVE or LIST your program to disk or cassette.

Don't type the
TYPO II Codes!

SOFTWARE, ETC.

The first 100 requests for our list of Atari 800/XL/XE PD disks will receive our best selling game disk free. Hurry before the free disks are gone! Limit one free disk per address. 1st Byte, P.O. Box 130822, Tyler, TX 75713

Try us for your Atari Public Domain software needs. Good prices, fast service, Write for free catalog. Vulcan Software, PO Box 692 Manassas, VA 22111-0692. (1/89)

Stop overpaying for PD software!!! All 8-bit disks only \$2.00 each, ST only \$3.00. Quantity discounts, great selection. Specify computer. Send large SASE: MWPDS, 890 N. Huntington St., Medina, OH 44256.(1/89)

Public domain Disks: ST \$4.00, 800/XL/XE \$3.00. Largest ST selection. ST Bible on disk \$39.95. Blank disks \$CALL. VISA/MC. FREE Catalog—Call or Write, Specify Computer. BRE Software, 352 W. Bedford, Suite 104-AN, Fresno, CA 93711. (800)622-7942, (209)432-2159 in CA.(2/89)

MULTITUDINOUS MUSIC LIBRARIES—This ST PD melodious music library includes BACH to ZEPPELIN in MUSIC STUDIO/CONST. SET, EZ TRACK and SID file formats. Includes PD player to play them all! For our Music Set #1 (3 disks including our catalog) rush \$9 plus \$2 shipping to: MARS Merch., Dept 76, 15W615 Diversey, Elmhurst, IL 60126-1257. (312)530-0988.(1/89)

SI's Fantastic Selection of packed ATARI 8-bit (D-S)/ST PD Theme Disks is Far SUPERIOR to all other collections we've seen—TRY US! Send for MLX GAMES' GREATEST HITS (our Most Popular title), plus SI's newest Catalog, for 8-bit/\$3.00 or ST/\$4.50. Catalog alone (specify system)/\$2.00. SOFTWARE INFINITY, 642 East Waring Avenue, State College, PA 16801.(1/89)

ANTIC SEEKS AUTHORS for SOFTWARE MAGAZINE ARTICLES. For Details, send self addressed stamped envelope to: AUTHOR INFO, c/o ANTIC, 544 Second St., SF, CA 94107.

SynFile+ UTILITY PROGRAMS. Print file layout, create and save reports, undelete records, alter look-up tables, etc. \$19.95 plus \$2.00 P&H. Send large SASE for more info. SFP, 4 Forest Drive, Palmyra, VA, 22963.(2/89)

Enjoy two outstanding PD space games! STARLORDS and TACTREK—challenging strategy, action—both only \$6.00. Catalog FREE. . .demo disk, \$3.00. Homemade, 6011 Hyde Park Circle, Suite 201, Jacksonville, FL 32210 (1/89)

New! AUTOPREP Disk_INITIALIZER

Ends repeated DOS prompts, saves time. Automatically formats single or dual density, writes your choice of DOS files, RAMDISK. COM and/or AUTORUN.SYS—all without DOS. Specify once, then initialize 10 or 10,000 disks with no more prompts. Fast, accurate for Atari 8-bits, min. 32K, DOS 2.0 or 2.5. Only 14.95 + \$2 shipping, check or M.O. (New Yorkers add \$1.05 sales tax). HELPWAYS, Box H, Rochester NY 14623 (1/89)

Martian Solutions: BLOOD & DUNG Order BLOOD and you'll receive a 3+ page detailed Order BLOOD walk-through of Captain Blood. Just \$3.50 + .50 shipping. With the 100+ page DUNG (DungeonMaster Notes Galore) you can finally solve FTL's great game. Includes Spell List, Detailed Maps of ALL levels, hints, tips & solutions for the toughest puzzles. \$9.95 plus \$1.05 shipping. Mars Merch. (address, etc. below.) Martian Light Phasar: We've converted a major manufacturer's gun to be used with all Atari 8-bit computers. 100% compatible with the Atari XL/XE game system gun. We believe it to be more accurate and better weighted than most any gun in the universe. \$39.95 plus \$3 shipping (UPS). 312/530-0988 MARS Merchandising, 15W615 Diversey, Elmhurst, IL 60126-1257 (2/89)

Fountain of the Gods Tribute to the classic TELLENGARD. Hundreds of unique rooms and corridors to explore. Find and explore the underground lake. Two-sided machine language disk for 8-Bit only. Send \$14.50 to Joe Butner 4005 Rogers St., Oak Hill WV 25901. (1/89)

Tech Tips

HI-RES GRAPHICS 8

This graphics demonstration is by Clay Halliwell, a computer science major at Southwest Missouri State University.

According to the official manuals, Graphics 8 is a bit-mapped mode with a resolution of 320 x 192—and only two colors. Of course, most programmers know this isn't quite true. In this mode, the pixels plotted in even columns are blue, odd-column pixels are green, and two or more adjacent pixels produce white. This often-discussed effect is commonly known as "artifacting."

Actually, the following strange technique has been around for years. You see, Graphics 8 is backwards! An average Graphics 8 screen might have the background set at luminance 0 (dark) and the drawing color at luminance 10 (bright).

Let's take the drawing color and fill in every point on the screen. An entirely filled screen is very white and painful to look at. But you can swap the colors by changing the full-screen drawing color (which is now effectively the background) to a darker luminance 0. Then change the background color to a brighter luminance 10.

The screen is again black, except you now turn bits on instead of off to draw (or just use COLOR 0). We have entered Graphics 8 Plus. As shown in the demonstration program below, Graphics 8+ differs from regular Graphics 8 in the following ways. Pixels are sharper, brighter, and less prone to bleeding. Artifact colors are much more solid-looking and don't have the vertical "hum-lines" present on some TV sets. On monochrome displays all pixels present a uniform luminance. Also, all of the above applies to Graphics 0 as well.

Don't type the
TYPO II Codes!

DOSINI HOUDINI

Running a machine language routine on [RESET] is tricky. While nothing happens to your Atari's built-in RESET routine itself (location 61723), DOSINI (memory locations 12 and 13) is affected. The RESET routine jumps to the operating system's warm-start routine WARMSV (58484, \$E474). But DOSINI is executed during warm-start, so we can use DOSINI to trap [RESET].

To do this, you must store the low byte of your routine's starting address into location 12, and the high byte in location 13. However, DOSINI MUST be executed. The first instruction in your routine MUST be a JSR to the original DOSINI starting location.

Now when you press [RESET], the operating system jumps to what it *thinks* is DOSINI but is actually your program. Then your *program* will JSR to the real DOSINI, and when it returns, the operating system will continue on its merry way, running the rest of your machine language program.

Greg Vozzo is from Brightwaters, New York. This is his first appearance in Antic.

Antic pays \$25 for every original and exclusive Tech Tip submission that we publish. Send your 8-bit or ST disk and printout to: Antic Tech Tips, 544 Second Street, San Francisco, CA 94107. Tech Tips welcomes very short programs that demonstrate the Atari's powers, simple hardware modifications, or useful macros for popular software.

CompuServe Now Available
at **Radio Shack**

Don't Be A Solitary Atari.

The largest and longest standing group of Atari® users in the world shares its problems and solutions online every day in CompuServe's Atari Forums. And you can join them.

Find the latest software, like the new desktop publishing program for the ST. Learn how to run Macintosh® and MS-DOS® programs on your Atari. And pick up helpful game tips from experienced players.

Need technical help? Atari personnel and most third-party software and hardware vendors are online

every day. You can even provide recommendations as they develop new programs and products. There's no better way to get more out of your Atari.

To join CompuServe, see your computer dealer. To order direct or for more information, call 800 848-8199. In Ohio and Canada, call 614 457-0802. If you're already a member, type GO ATARI at any ! prompt.

CHRONO-QUEST

A CLASSIC ADVENTURE GAME FROM PSYGNOSIS

- ★ FULL ICON CONTROL
- ★ BRILLIANT GRAPHICS
- ★ FIENDISH PLOTS
- ★ A RACE AGAINST TIME
- ★ 4 DISKS ATARI. 3 DISKS - AMIGA
- ★ IBM VERSION - COMING SOON

CHRONO-QUEST

This is the first of a new generation of adventure games from Psygnosis. An adventure game in the classic sense.

Your quest begins in your fathers chateau circa 1920, there you find (or should find) your fathers latest invention; a fantastic time machine. Your father is **dead, murdered**, you are the prime suspect. A letter left by your father leads you to think the real culprit was Richard, his not so faithful servant. **But he has escaped to the future using the time machine . . .** who will believe your fantastic story . . . do you believe it?

You will be presented with many objectives; ultimately you will have to travel through time to collect the fragments of magnetic card to drive the Time Machine into the future. There you will have to . . . Meanwhile, the immediate objective is to find the time machine . . . Sorry, a more immediate objective is to find the room with the time machine in it . . . But its dark . . . Very sorry, an even more immediate objective is to be able to see where you are going . . . 3 hours and 250 minutes and even more immediate objectives later, you are standing in the hallway thinking . . . hellpppp!!!!!!
